#### Features & Benefits

- The latest sheers, light filtering, solar screen and room darkening fabrics; select fabrics are NFPA
   701 and GREENGUARD certified.
- Safer lift systems, including our PrecisionLift™ Cordless

   certified WCMA Best for Kids™

- PrecisionLift™: also known as our new cordless roller shade. To lower, gently pull the shade by the handle to the desired location. To raise, simply push the hem bar to the desired location. No additional pulling or tugging is required.
- · Tension adjustment dial allows you to fine tune when necessary
- Choose from a wide array top treatment options to cover the fabric roll, including curved and square fascia, fabric valance or deluxe wooden valance.
- Optional innovative Light Guard mounts to the window and helps achieve maximum light block effect even on the top and sides.
- Hem bar options
  - Plain Hem Bar: Clean, sleek and sturdy; perfectly weighted to provide seamless function.
  - Fabric-wrapped Hem Bar: The matching fabric wrap provides a more uniform look throughout the shade

#### Lift Systems & Applications

- PrecisionLift™ Cordless
- Continuous Cord Loop
- SmartRelease<sup>TM</sup>
- Motorized
- Applications: Side by Side, Dual Shades, & Coupled Shades

#### Fabric List & Information

#### **Max Fabric Width**

- Max Width is considered the max available before railroading, and/or before additional lift system limitations. It is not the max order shade width. See Size Considerations.
- The size range is provided for fabrics available to railroad, under Max Width column. All other fabric are not available to railroad.

#### **Color Coordination:**

Each fabric has a set of pre-coordinated default hardware colors. If you wish to override these default colors, please specify in your order selection. Components that available to override color coordination include:

	Stainless Steel	White	lvory	Black	Silver	Nature	Terra	Sahara	Chocolate
Chain	✓	✓	✓	✓					
Square Facia (Plain) /Curved Fascia (Plain)		✓	✓	✓			N/A		
Hem Bar (Plain)	N1/A	✓	<b>✓</b>	✓					
Curved Fascia with Fabric End Caps	- N/A	✓	<b>✓</b>	<b>✓</b>	<b>√</b>	✓	<b>✓</b>	<b>✓</b>	✓
Fabric-Wrapped Hem Bar		✓	<b>✓</b>	<b>✓</b>	✓	<b>✓</b>	<b>✓</b>	<b>✓</b>	✓

- 1. \*\*Only End Caps on fabric-wrapped components are available with the 8 colors above.
- 2. All other components will coordinate between White, Ivory, and Black only.
- 3. *Miscellaneous Components* such as Raceway, Tension Dial, shade bracket, the back of a fabric-wrapped hem bar and other parts have defaulted color coordination between *White, Ivory, and Black,* based on the selected fabric. Not available for color override.
- 4. <u>Dual shades:</u> Dual brackets and bracket covers are matched with the color of the front shade. Other components such as clutch, end plug, bead chain, and hem bar, will be matched to the fabric of each shade based on the color coordination chart above.

#### Discontinued Fabrics:

The following fabrics are no longer available. Please remove from samples immediately.

#### Room Darkening

- **F0456 Mustard** in Loft AA0310
- F0455 White in Loft AA0310
- F0833 Gray in Bermuda AB0612
- F0847 Raspberry in Glamour AB0626

- F0653 Brilliant White in Jewel AA0314
- F0457 Graphite in Loft AA0310
- TU457 Grapinie III Lon AA051
- F0458 Blue in Loft AA0310
- F0459 Linen in Loft AA0310
- F0843 Willow in Glamour AB0626

#### LF Designer

- F0756 Toffee in Emery AB0604
- **F0757 Onyx** in Emery AB0604
- F0880 Mocha in Francis AB0615

## LF Sheer & Natural

- F0666 Natural in Bali A90105
- F0667 Tan in Bali A90105

#### Solar Screen (Commercial/PVC)

• F0449 Charcoal in W120 (12%) AB0436

## \*\*Fabric Phase-out:

The following fabrics are **currently available** but are being phased out by the end of the year.

#### Room Darkening

F0652 Sugar Peach in Jewel AA0314

#### LF Sheer & Natural

- F0903 Garden in Sheer AB0621
- F0855 Redwood in Sumatra AB0605

#### Solar Screen (Commercial/PVC)

• F0448 Chestnut in W120 (12%) AB0436

#### Fabric List & Information

#### Railroading

Fabrics can be turned 90° space clockwise (width for height) to accommodate wider windows. Railroaded fabrics may curl along the edge. This is considered normal and is not a product defect. Railroading may be required a few inches smaller than the fabric width and width due to factors, such as standard fabric deductions, allowances for fabric to be attached to the roller tube, etc. For fabrics with distinct patterns, if certain shades require railroading, it is optional to railroad shades on the same order for a consistent look.

#### **Opacity and Light Control**

Fabric Opacity	Description	Privacy Level
Sheer	Provides an atmospheric touch with significant view-through while softening the outside view. Objects in the room can be seen clearly through sheer shades.	Minimal
Light Filtering	Offers a wide range of light diffusion from bright to dim. Shapes or outlines may be seen through these shades but details are not visible.	Medium
Room Darkening	Blocks a significant amount of incoming light and provides maximum privacy. A perfect choice for rooms where blackout and privacy control is a must.	High

#### **Fabric Disclaimers**

Due to the nature of the weaving process, some imperfections in the weave is considered normal. Fabric appearance can vary based on the indoor light intensity. Railroaded fabrics may curl along the edge. This is not a defect and is considered normal. Due to variations in fabric and dye lots, colors or sheens may vary slightly. It is recommended that all shades for the same room be ordered at the same time to help ensure color consistency.

**Natural shades** may have variations and visual inconsistencies in color, grain and texture. They may also crack or split, twist or bow, shrink or stretch, and change color over time due to aging, texture, direct exposure to sunlight, or other climatic conditions. These unique characteristics are inherent in natural materials and are not considered defects in material or workmanship. Exact color matches cannot be guaranteed.

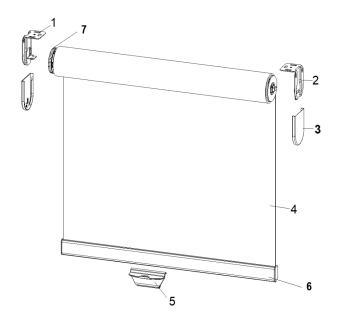

#### **Linen Fabrics**

Maui and Breeze collections contain linen components. The natural, inherent characteristics of linen may lead to color variation when shades are ordered at different times.

**Solar Screen** Openness factor refers to approximately how tight the weave is. Solar screen fabrics have different textures and patterns, and the angle of the yarns can affect the passage of the light. A low openness factor means the fabric is more tightly woven and that there will be less visibility through the shade with a higher degree of light control. A high openness factor provides better view-through with a lesser degree of light control. It is within industry standard that solar screen fabrics have a minimum tolerance level of +/- 10% in openness factor. As a result, openness cannot be used to determine visibility, glare and thermal control.

During the shipping process, the material may shift slightly due to its woven construction, causing slight shortening or uneven edges. There may also be slight creases in fabric. To remove creases, immediately unroll the shade completely, extend, and let it hang for several days.

## Lift Systems - PrecisionLift™ Cordless

No.	Description	Remark
1	Shade Bracket	For Tension Dial end
2	Shade Bracket	For End Plug end
3	Bracket Cover	Default for inside & outside mount
4	Fabric	
5	Handle	
6	Hem Bar	
7	Tension Adjustment Dial	

PrecisionLift™ also known as Cordless, is our newest lift system available for roller shades.

Featuring exclusive one-touch lift technology for quick, accurate, and nimble control. To lower, gently pull the shade by lifting the handle to the desired position. To raise, just push the Hem Bar to the desired location. No additional pulling or tugging is required.

If the shade does not stay at the desired location, it can be fine-tuned with the tension adjustment dial.

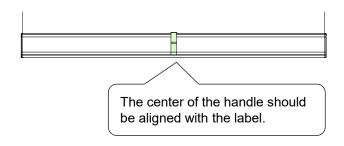

#### Notes:

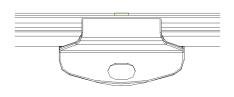

- Raceway is optional for cordless when ordered without top treatment. Raceway is default when ordered with a top treatment.
- Cordless is not available for Coupled Shades.
- One pole will be provided per cordless shade order. Additional poles can be requested.

#### **Important Disclaimers & Tips:**

Aligned hem bar level: For side by side PrecisionLift™ Cordless shades, the amount of hem bar exposed when the shade is raised all the way to the top may vary, depending on speed when lifting the shade and other factors. Therefore, we can't guarantee the hem bars are lined up perfectly when shades are raised to the top.

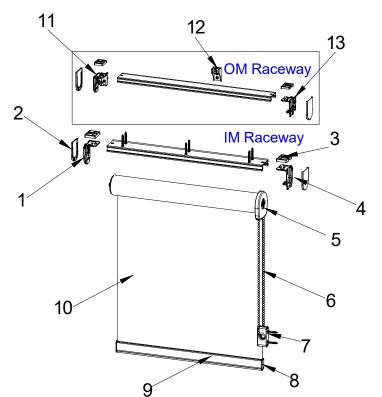

Telescoping: To prevent telescoping, first ensure the shade is installed in a level manner; using shims if necessary. Additionally, the handle must be placed in the center of the hem bar. (Refer to diagrams below.) If telescoping occurs, lower the shade completely and slowly raise it applying even pressure to correct the alignment.

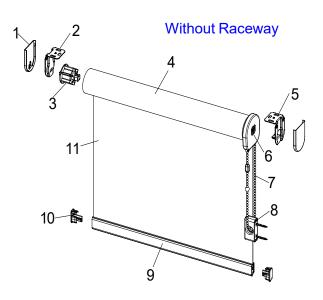

## Lift Systems - Continuous Cord Loop

For Continuous Cord Loop, the Raceway is only optional when there is no top treatment. When any type of top treatment is selected, raceway will be included by default.

No.	Description	Remarks
1	Shade Bracket	For inside mount end plug side

## Lift Systems – SmartRelease™ (Includes Raceway)

This exclusive, and patent-pending innovation to cord loop systems allows the shade to be released or lowered from an upward position with a gentle pull.

 Raceway is provided for SmartRelease<sup>™</sup>, whether or not there is a top treatment.

## **Motorization**

## Lift Systems – Applications

#### **Dual Shades**

- Like two shades in one, Dual Shades feature one shade behind another- allowing for ultimate light and privacy control
- Available in all Lift Systems
- Each shade is controlled independently and can be assigned its own lift system
  - Front shade reverse roll, rear shade -standard roll
  - · Control location: front shade right, read shade left
  - Available with No Top Treatment or 7" Fabric Valance
- The raceway is an integral part of the dual shade design and will be provided.

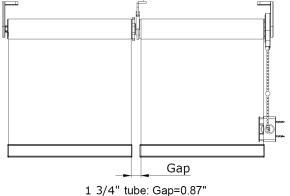

#### Notes:

- The minimum (width & height) is based on the larger of the two minimums
- 1 3/4" tube will always be used for dual shades with mixed lift systems

## Coupled Shades

- Great for side by side windows with small gaps
- Coupled shades allow two shades to be operated together by one control
- Available Lift Systems: Continuous Cord Loop, & Motorized
- Not available with:
  - SmartRelease™
  - PrecisionLift™ Cordless
  - · Raceway or Top Treatments

Note: Supplied spacer blocks must be installed to compensate for height difference

1 3/4" tube: Gap=0.87" 2" tube: Gap=0.94"

## Side by Side Shades

Side by Side shades can be selected to match shades within the line items of your order.

- Must have the same lift system
- Must have the same application (ie. cannot match a Dual Shade with a Coupled Shade)
- Must have the same Top Treatment

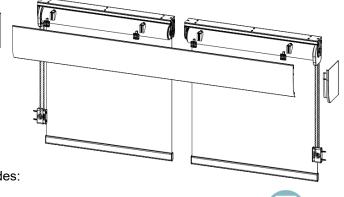

## **Top Treatments: Fascia & Valance Options**

Options	Color/Material	Sizes	Remark
Curved Fascia	Plain: White, Ivory, and Black  With fabric insert: Fabric: Defaulted to the selected shade fabric.  End Cap: White, Ivory, Natural, Terra, Sahara, Chocolate, Silver, and Black	3 ½" or 4 ½" *	For Curved Fascia with fabric insert, the max width is subject to fabric max width and the availability of railroading.  *Fascia size will be based on shade size, see chart. Matching sizes are available.  Material: Metal
Square Fascia	White, Ivory, and Black Material: Metal	3 ½" or 4 ½" *	*Fascia size will be based on shade size. Matching sizes are available.
Fabric Valance	The default fabric on this valance will be the selected shade fabric.  *For Dual shades, desired fabric should be manually selected.	- 4 ½" - 7"	Max width is subject to fabric max width and the availability of railroading  When valance width exceeds (max fabric width – 5") the valance will need to be railroaded. (For select fabrics only)  Valance returns available for semi IB & OB
Crown Valance	Material: Wood  Paint: Pure White, Bisque, Stone Gray, Clay	4 ½"	Valance returns available for semi IB & OB; for full OB
Modern Valance	Stain: Limed White, Dark Teak, Weathered Teak, Wenge, Black Walnut, Matte Black	4 ½"	Valance returns available for semi IB & OB

\*Note: Top treatments are <u>not recommended</u> for door applications.

## **Common Top Treatment**

- Available for all top treatments types
- Available for all lift systems, except Coupled Shades
- One Common Valance can share up to 4 shades
- All splicing rules apply to oversized Common Top Treatments.
- The minimum fabric gap between shades vary by lift system. Refer to the Fabric Gaps table.
- There is no additional bracket gap between two shades:
  - Additional Requested Gap: 0"-12"

## **Top Treatments: Fascia & Valance Options**

## **Splicing Top Treatments**

Top treatments wider than its maximum limitations will be spliced. A **top treatment joinery** method is required to provide support on all spliced top treatments. This applies to single valances, and all common top treatments.

- · Single fascias will not be split.
- For all oversized single and common valances, valance connectors will be provided, or keystones can be selected as an option.
- · For all oversized common facias, keystones will be provided.

	Top Treatment Joinery (Valance Connectors & Keystones)								
Туре	Top Treatment	Max Length	Default Splice Location	Default Valance Joinery	Optional Valance Joinery

	V<06"	Y≦96"	3 ½"
SmartRelease™	X≦96"	Y>96"	4 1/2"
	X>96"	All heights	4 ½"

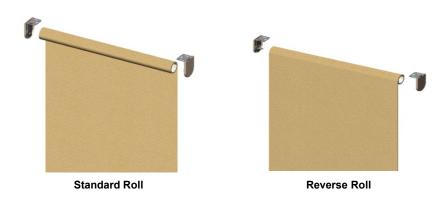

Note: Fascia sizes will not be automatically matched for entire orders. "Side by Side" needs to be selected or specified in special instructions while placing the order to avoid any matching issues.

## **Return Size Options**

Valance	Inside Mount	Outside Mount		
4 1/2" Fabric	1", 1 1/8", 1 1/4", 1 3/8", 1 ½"	Default		
7" Fabric	(Custom sizes: 1 5/8" - 4 1/2")			
4 1/2" Crown Wood	1/2", 5/8", 3/4", 7/8", 1", 1 1/8", 1 1/4", 1 3/8", 1 ½"	Custom sizes longer than standard:(1/8", 1/4", 3/8", 1/2",		
4/12" Modern Wood	(Custom sizes: 1 5/8" - 4 1/2")	5/8", 3/4", 7/8", 1")		

#### **Fabric Roll**

- Standard Roll: Fabric rolls down against the window glass.
- Reverse Roll: Fabric rolls down away from the window glass.
  - Reverse roll is default for dual shades.
  - Not available with Square Fascia or Curved Fascia.

## Poles for PrecisionLift™ Cordless Shades

One complimentary 30" Fiberglass pole is included, per cordless roller shade order. Additional poles and pole attachments can be added to your order as an option.

Additional 30" Fiberglass Pole

- Cordless Operating Pole
  - Color: Black

- Pole Attachment
  - Color: Black
  - · No pole included, attachment only
  - · Screw-on design
  - · Compatible with most screw tip poles
  - NOT compatible as a replacement piece for Cordless Pole

## Chain for Continuous Cord Loop & SmartRelease™ Shades

#### Chain Options:

Standard: Plastic - Available in White, Ivory, Black

· Upgrade: Stainless Steel

#### Chain Length

	Order Height	Chain (For Smart	Chain Length (For Continuous Cord		
	Order Height	Plastic Chain	Stainless Steel Chain	Loop)	
	12"≦Y≦30"	16"	16"		
	30" <y≦42"< td=""><td>24"</td><td>24"</td><td></td></y≦42"<>	24"	24"		
Default	42" <y≦54"< td=""><td>36"</td><td>36"</td><td>(2/3)Shade Height + 6"</td></y≦54"<>	36"	36"	(2/3)Shade Height + 6"	
Delault	54" <y≦66"< td=""><td>48"</td><td>48"</td><td>(2/3)Shade Height + 0</td></y≦66"<>	48"	48"	(2/3)Shade Height + 0	
	66" <y≦90"< td=""><td>60"</td><td>60"</td><td></td></y≦90"<>	60"	60"		
	90" <y≦144"< td=""><td>84"</td><td>84"</td><td></td></y≦144"<>	84"	84"		
Optional	All shade heights	Optional Lengths: 16", 24", 36", 48", 60", 84"	Custom Length must be longer than 12".	Plastic/Stainless Steel: custom length must be longer than the default.	

#### Notes:

- Chain width is measured from the top of the brackets/installation bracket (raceway) to the bottom of the tension device.
- The tolerance for chain width of SmartRelease™ would be 0~1.18".

#### Hem Bar

- Default: Plain hem bar
  - · Available in White, Ivory, and Black
- Optional: Fabric-wrapped hem bar
  - Front: Wrapped with the selected shade fabric
  - Back: Will not be fabric-wrapped. Back hem bar color will provide in the default color and is not available for color coordination override. See color coordination chart.
  - End caps: Available in White, Ivory, Natural, Terra, Sahara, Chocolate, Silver, and Black

#### **Hold Downs**

Choose from Traditional or Magnetic hold-down brackets (one for the left and the right side of shade) to secure the shade in place when closed.

#### · Traditional Hold Down

· Optional for window applications

#### Magnetic Hold-Down

- Defaulted for door applications.
  - Magnetic hold-downs are required for door applications to help keep the shade in place.
  - Not recommended for metal door applications.
- Optional for window applications.

Magnet

**Magnet Catch** 

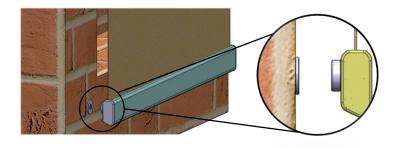

- The magnet will be pre-installed at the factory on the hem bar.
- The magnet catch, which needs to be installed at the job site, can be found in the hardware box.

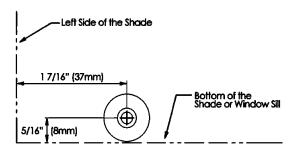

#### Available colors for Magnet Catch

- Nickel-Plated (Default)
- (Optional) Pure White, Silk White, Bisque, Pearl, Bright Brass, Antique Brass, Black, Crisp Linen, String, Sea Mist, Stone Gray, Brown Gray, Taupe Gray

Allow extra wall space for installation:

- 1 7/16" in width, from the side edge of the shade
- 5/16" in width, from the bottom edge of the shade or window sill

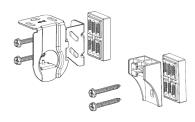

#### Shim (Spacer Block)

- Dimensions: 41mm (1.614") x 10mm (0.394")
- · Up to 3 Spacer Blocks can be stacked per bracket
- Optional

## **Light Guard**

- · Light Guard is specifically designed to block incoming light escaping off the top and sides of the window opening
- The application consists of two side light guards (Wood or PVC), & a top light guard

	Dimensions	Available colors
Wood Light Guard (Side)	7mm (0.28")  *001 Pure White, 013 Bisque, 049 Stone Gray, size is 1.18" x 1.37"	001 Pure White 013 Bisque 049 Stone Gray 053 Clay  110 Limed 212 Dark Weathered Teak Walnut Black
PVC Light Guard (Side)	35mm [1.38"]	2052 Day Light, 2021 Cloud Cream, 2583 Warm Sand, 2480 Chocolate, 2129 Silver, 2208 Black
Top Light Guard	4 ½"	Standard color: White Stucco Made of PVC
Dual Shades Top Light Guard	7 ½"	Used for Dual Shades only  Color will vary:  Top Light Guard piece will match the RD fabric (or rear shade if both are RD fabrics)  F0822 Pure White in Fiji will be provided as the light blocking piece when there are no RD fabrics.

## Minimum Mounting Depth Requirements for Roller Shades with Light Guard

	minimum mounting Boptin requirements for Roller Glades with Light Guard								
	1 1/8" tube	1 ¾" tube	2" tube						
Continuous Cord Loop	0.75"	0.75"	0.75"						
	Cordless 1 ¾" tube	Motorized 25 CE/25 TE, 1 3/4" tube	Motorized 35R, 2" tube						
Cordles/ Motorized	0.75" 2.87"	0.75"	0.75"						

## Size Considerations

	s	Single Shade			Dual Shade			Coupled Shade		
	Clutch	Cordless**	Motorized	Clutch	Cordless**	Motorized	Clutch	Cordless	Motorized	
Min Width	8" (12" for Smart- Release™)	18"	14"	8" (12" for Smart- Release™)	18"	14"	24"	NA	26"	
Max Width	118"	96"	118"	96"	96"	96"	236"	NA	236"	
Min Height	12"	12"	12"	12"	12"	12"	12"	NA	12"	
Max Height	144"	96"	144"	96"	96"	96"	144"	NA	144"	

- This table is for reference only. There may be exceptions due to different fabric weight. For details by the fabric, refer to the appendix.
- For select fabrics that can be railroaded, after the fabric has been railroaded, the max shade height is approximately the original fabric width 12".
- \*\*PrecisionLift™ Cordless shades have additional size restrictions. Please refer to the rules below

Cordless Size Limitations				
Width (X) Height (Y)				
18"≦X≦19"	Y≦48"			
19" <x≦24"< td=""><td>Y≦72"</td></x≦24"<>	Y≦72"			
24" <x≦96"< td=""><td>Y≦96"</td></x≦96"<>	Y≦96"			

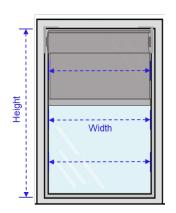

#### Inside Mount:

Shade width = Order width - 1/8" (Top Mount)

Shade width = Order width (Side Mount)

Shade height = Order height (Top & Side Mount)

#### **Inside Mount**

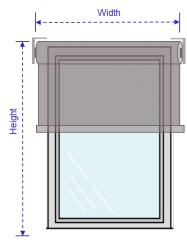

#### **Outside Mount:**

No Deductions—

Shade width = Order width Shade height = Order height

Recommendation: To avoid light leakage, add at least 4" to the width, and 2" to the height.

#### **Outside Mount**

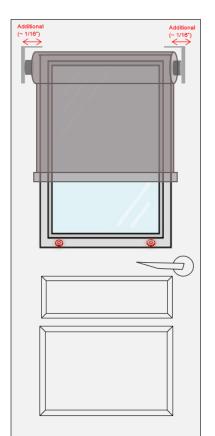

#### **Deductions for Roller Shades with a Common Valance:**

(IM)

Left shade width = left shade order width - 1/8"
Center shade width = center shade order width - 1/8"
Right shade width = right shade order width - 1/8"

(OM)

Left shade width = left shade order width Center shade width = center shade order width Right shade width = right shade order width

#### Roller Shades Installed on a Door

To receive shades suited for door applications, please select the option during order entry. When selected,

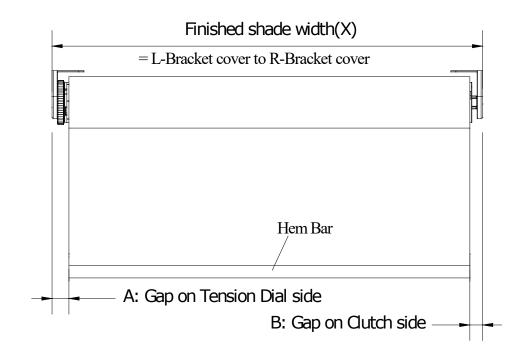

• Shades will have an <u>additional</u> fabric deduction of approximately 1/16" (2mm) on each side in order to prevent the fabric from fraying.

(See fabric deductions by lift system for total fabric width deductions.)

- Magnetic hold-downs are defaulted and required when installed on a door.
- Top Treatments are available but not recommended for door applications.

## **Hardware Information**

Different hardware will be provided for different control systems. The qty of some hardware will depend on the shade width. See below for more information.

## Mounting Bracket (OM with raceway):

Shade width X(")	Qty	
8" ≦X≦40"	2 End Mounting Brackets	
40" <x≦80"< td=""><td colspan="2">" <x≦80" +="" 1="" 3="" brackets="" brackets<="" end="" installation="" middle="" mounting="" td=""></x≦80"></td></x≦80"<>	" <x≦80" +="" 1="" 3="" brackets="" brackets<="" end="" installation="" middle="" mounting="" td=""></x≦80">	
X>80"	4 End Mounting Brackets + 2 Middle Installation Brackets	

## Mounting hardware for top light guard piece (with light guard):

Shade width X(")	Qty
X≦40"	2
40" <x≦68"< td=""><td>3</td></x≦68"<>	3
68" <x≦96"< td=""><td>4</td></x≦96"<>	4
X>96"	5

#### Valance Bracket for Wood/Fabric Valance:

Shade Width X(")	Qty
X≦40"	2
40" <x≦68"< td=""><td>3</td></x≦68"<>	3
68" <x≦96"< td=""><td>4</td></x≦96"<>	4

<sup>\*</sup> For common valance or valance in custom width, the qty of valance bracket=(Outer width of each piece -12")/28+1

## Valance Bracket for Square/Curved Fascia:

Shade Width X(")	Qty
X≦40"	2
40" <x≦68"< td=""><td>3</td></x≦68"<>	3
68" <x≦96"< td=""><td>4</td></x≦96"<>	4
96" <x≦124"< td=""><td>5</td></x≦124"<>	5
X>124"	6

<sup>\*</sup> For fascia in custom width, the qty of valance bracket= (Custom width -12")/28+1

# **Cleaning Roller Shades**

Routine cleaning will help maintain the beauty of your shade.

Proper ways to clean Roller Shades:

- Use a hand held vacuum to remove debris
- Use a duster to remove any light dust
- Spot clean by using a soft cloth or sponge moistened with lukewarm water. Add mild detergent, if needed. Blot gently to avoid creasing or damaging the fabric. Rubbing can damage the fabric.

Do not iron roller shade fabrics.
