

WOODLAND BLINDS, L.P.

FEATURES, SPECIFICATIONS, BASIC ORDER INFORMATION

Solar Clutch Roller Shades Features

Phifer SheerWeave Fabrics offered in 5 of the most popular series:

- Series 2390 (5%) / 2360 (10%) / 2410 (3%) / 2500 (1%)
- Series 3000 (14%)
- Series 4000 (5%) / 4100 (10%) / 4400 (3%)
- Series 4800 (1%)
- Series 5000 (Varies)
- Series 7000 (Blackout)

Quick-Ship Program - Select fabric colors within each series should ship in 3 to 5 business days with minimal material delays. (See attached color chart)

Special Order Program – May require longer lead times based on current inventory levels. All Phifer SheerWeave Fabrics are available.

RollEase R Series Clutch System

- Roller, clutch & hardware size is determined by the size of the individual shade. Shades may not match as a group. You may specify matching hardware for an order or group of shades. Additional charges to match groups of shades will apply. Shades with different lengths will result in different roll sizes even when the same size tubes are used.
- R3, R8 or R16 Clutches are standard. Size restrictions are based on width and length of shade. Clutch size may vary according to RollEase recommended specifications.
- Minimum width – 6” net width; Minimum drop – 10”; Maximum width and length vary by fabric. See price charts.

Galaxy Clutch System

- Large shades may require the Heavy Duty Galaxy Clutch System with 2-1/2” roller tube (shown in shaded areas on the price charts).
- The price is included in the price of the shades in the shaded areas only. A surcharge will apply to any shade ordered with the Galaxy Clutch that is not in the shaded areas on the price charts. Colors available: white & black.

Spring-Loaded Roller - Available upon request at no charge - Not available with Fascia or Cassette System.

- Minimum Width - 19.5" ordered width; Minimum Drop - 10"
- Maximum Width - 96" - Cannot Rotate 5000 Series Fabrics
- Maximum Drop - 120"

Roller Tube – Metal tube in varying sizes (1” to 2.5”) based on individual shade width & length. Fabric is attached with tape to roller. Shades wider than 108” may have minor deflection in center.

Universal brackets (for inside, outside or ceiling mounting) for standard shades are available in white or black.

All mounting hardware is included.

Fascia – Available with a surcharge.

- Extruded aluminum panel that hides the tube. Standard fascia is 4” tall. 3” fascia is offered when specified (size limitations apply). Colors available: anodized aluminum, bronze, white, vanilla and black.
- Fabric Wrapped Fascia – fabric can be applied to the 4” fascia to provide a matching, finish look. This option is not available on the 3” fascia.
- Fascia color must be specified on order. Hardware and external hembar (if ordered) will match the fascia color.
- Fascia brackets (matching color) include end caps.

Cassette – Available with a surcharge.

- RollEase Cassette R120. Made of extruded aluminum – 3-3/4” height x 4” depth.
- Colors available: Anodized aluminum, bronze, white, vanilla and black.
- Maximum width is 120”, maximum length is 120”. Size restrictions vary by fabric, see price charts for restrictions.
- Hardware and external hembar (if ordered) matches cassette color.

Solar Clutch Roller Shades

Page 2

Hembar

- Flat metal hembar sewn into bottom of fabric is standard.
- External hembar available upon request at no charge with baked enamel finish that matches most commercial window frames: anodized aluminum, white, vanilla, bronze & black. Hardware and external hembar will match fascia color unless otherwise specified.
- External wrapped (fabric covered) upon request at no charge.

Fabric Width

- Inside mount shades are made for brackets to be mounted inside the window with the top window width equal to the size ordered.
- No deduction on outside mount.
- Fabric deductions for all shades vary based on size of shade and clutch from 7/8" to 1-3/8". Fabric and tube are made the same size.

Limited Lifetime Warranty

All prices are FOB Factory, Houston, Texas. Freight will be prepaid and added to each invoice.

**** Quick Ship Program - Woodland Blinds commits to ship these colors (marked with ** and listed in bold above) in 1 business day as defined by our 1 Day to Build Program. Inventory levels will be maintained to keep material delays to a minimum.**

Special Order Program - Orders for fabrics not included in the Quick Ship Program will be accepted based on current inventory levels and unused fabric. These orders may experience longer production times depending on current inventory levels. You will be notified by the end of each business day whether we will accept the order. Once fabric is in stock, production time should be within 1 business day.
