

NATURAL WEAVES SHADES

MEASURING INSTRUCTIONS

Please use steel tape measure to insure proper measurements

Inside Mount

Measure the inside width at top, middle and bottom of your window opening. Use the smallest measurement when ordering. Measure the height of the opening on the left, center and right, use the smallest measurement when ordering.

Outside Mount

Measure the width and height of the area to be covered and provide exact dimensions required. It is recommended that blinds overlap the window opening by at least 1 1/2" on Woven Wood Shades. If mounting brackets are needed beyond the casing to clear obstructions (i.e. knobs, window cranks, etc.), specify extension brackets or spacers required.

Note: Inside mount measurements represent the exact window opening size, the factory will make the necessary deductions, 1/2" (+/- 1/8") to insure proper fit.

Woven Wood shade deductions are actually 1/2" deduction on fabric and 3/8" deduction on headrail. The fabric cannot be the same width as the headrail or the endcaps will "push" the fabric in on either side.

Outside measurements represent the exact blind size needed. A 1/8" allowance will be made on the fabric by the factory.

Minimum Depth/Flush Requirements

Minimum depth (minimum amount of space needed to install brackets) and minimum flush requirements (minimum amount of space required for inside mount blind not to project past the opening) are also given for each type of blind.

Standard Headrail

- Minimum depth requirement = 1"
- Minimum flush requirement = 2"

NATURAL WEAVES

- Minimum width 12" OB
- Maximum width 96" OB as single shade only
- Minimum height 12" OB
- Maximum height 96" OB
- Available top, back or side mounted
 - Turn OB bracket sideways for side mounting
- Available control left or right, right is standard
- Not available as multiple shades on one headrail
- Available in 52 patterns/colors
- Color coordinated cord and wood tassels
- Standard cord lift
- Standard safety cord stops
 - Cord cleats are not included
- Standard 6" high valance
 - 1 1/2" wide returns available-only on outside mount
 - Cannot specify return size
- Valance only available but must be part of order containing complete shades
- Waterfall Shades are made with material attached to the front of wood with a valance attached to the back of the wood headrail to hide components. The lift cord will be behind the material.
- Shades available as standard Roman Fold
- Hold downs are available only on OB mount shades. A wooden dowel is rolled into the hem.
- Not available with EZ Lift headrail
- Not available as Angle
- Not available with mitered cut or cut outs
- Available as Top-Down/Bottom-Up with surcharge
 - Maximum width 72"
 - Maximum height 96"
 - Not available as multiple blinds on one headrail
 - Standard two controls, left cord lowers top of shade and right cord lifts bottom of shade.
 - Cannot be combined with any other specialty application.
 - Standard Roman Fold
 - Not available with operable roman liner option
 - Top down has two valances, one in front and one in back.
 - Front valance will be as specified i.e. scallop, trim, etc
 - Back valance is always square and plain hem
- Liner options...
 - Colored liners have white backing. Color faces the shade, white faces the street.
 - Attached privacy liner – 50/50-cotton/polyester blend fabric.
 - Available with all options
 - In 3 colors...White, Khaki and Chocolate
 - Attached room darkening liner – 50/50 cotton/polyester blend fabric
 - Available with all options
 - In 3 colors...White, Khaki and Chocolate

- Attached liner is applied to the shade using 1 ½” clear garment tags. **(This is how they are made and this not a reason to issue credit if customer does not like.)**
- Operable Roman liner – light filtering or room darkening
 - Light Filtering or Room Darkening in 3 colors...White, Khaki and Chocolate
 - Roman shade operates independently of natural shade
 - Natural shade material attached to front of wood headrail and operable roman liner attached to back of wood headrail
 - Lift cords are in-between natural material in liner, do not show on front of shade
 - Shade strung with cord/tassels matching woven wood material
 - Not available with Top-Down
- Edge Banding
 - Available in Narrow (5/8”) or Wide (1 ½”) widths in 11 colors
 - See color list
 - Only available on patterns marked with [B] in price book
- All available hardware...
 - Inside mount brackets
 - Outside mount brackets
 - OB extended brackets
- Minimum Depth requirements 1”
- Minimum flush requirements approx 2” depending on pattern thickness
- Available as Perfect Arch Only
 - Minimum width 24” OB
 - Maximum width 72” OB
 - Minimum height 12” OB
 - Maximum height 36” OB
 - Available inside mount only
 - No control – does not operate
 - Available in all woven wood colors
 - Scroll trim around circular edge of arch is standard
 - Must specify trim color at time of order
 - Plain hem (same as woven wood shade) is standard
 - Straight trim available for arch hem in both Brush and Scroll, with surcharge
 - Liner not available
 - Perfect Arch only, not available as ArchTop
 - All available hardware...
 - Inside mount brackets with Velcro
 - Velcro patches on back of arch
 - Minimum depth requirements 1 1/2”
 - Minimum flush requirements 1 5/8 – 1 7/8” depending on pattern thickness

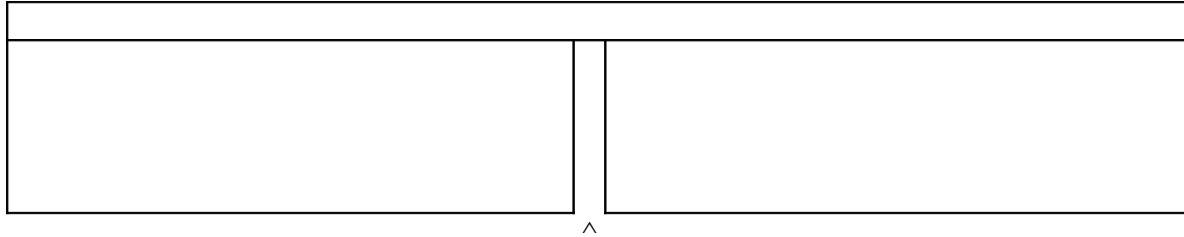

Edge Banding

- Available on natural weave shades including specialty items with surcharge
 - There are no size restrictions.
- Natural Weave patterns are limited. Patterns are marked with [B] in price book
 - Patterns without this symbol are not available with banding
- Not available on shades with scallop and trim valance. Plain hem only
- Not available on Top Down/Bottom Up.
- Not available with cut outs or hold downs
- 11 solid colors, available in 2 widths
 - Full width of banding will show front and back of shade
- Banding will be sewn on both sides and across the bottom of the shade and the valance.
- Banding is made of same material as our cotton/twill tapes shown in Southeast sample book

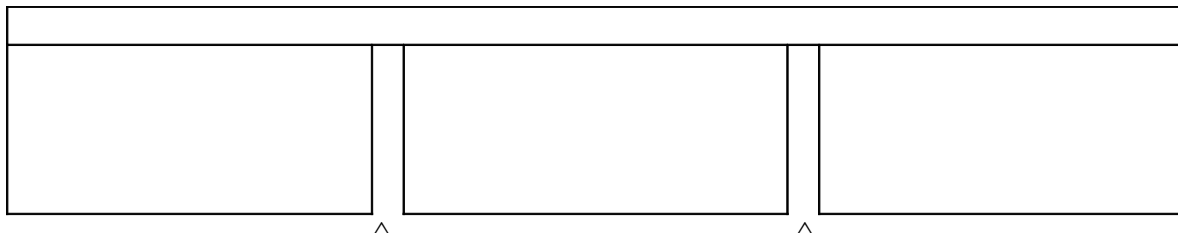

Color #	Color Name	1 1/2" Wide	5/8" Narrow

875	Black	√	√
995	Breeze Brown	√	√

NOT AVAILABLE as MULTIPLE BLINDS ON ONE HEADRAIL

2 ON 1 HEADRAIL

3 ON 1 HEADRAIL

NUMBER OF REQUIRED BRACKETS FOR NATURAL WEAVES

Note: There are no center supports for natural weave shades. The standard mounting brackets are spaced evenly across the headrail and can be used to top or back mount.

It is not recommended that anything over 48" wide be side mounted without some type of center support as this will cause the shade to sag.

Blind Width	Number of Brackets
0-40"	2
41-80"	3
81-96"	4
