ORDERING INFORMATION – CELLULAR SHADES

HOW TO PLACE YOUR ORDER

1. QUANTITY OF SHADES

2. **SIZE OF SHADES:** WIDTH first, then HEIGHT.
See page 5 for "How to Measure" instructions.

NOTE: Multiple shades on one headrail may be required for certain sizes, see page 40.

3. INSIDE OR OUTSIDE MOUNT:

For inside window frame installation, mark order "Inside Mount". For outside window frame installation, mark order "Outside Mount".

INSIDE MOUNT

OUTSIDE MOUNT

4A. CONTROL LOCATIONS:

Indicate whether control should be located on the left side or right side of the shade (right is standard).

4B. CONTROL OPTIONS:

Cordless Lift System, see page 35
Continuous Loop Lift System, see page 35
Motorization, see page 36
SlideVue™, see pages 26-34

5. SHADE FABRICS:

When placing your order, specify:

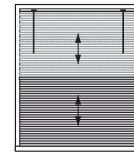

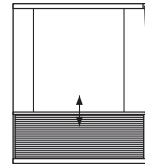

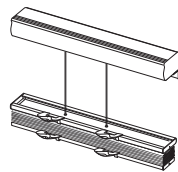

- Fabric name
- Color name
- Color number

6. OPTIONS: The following options are available (see pages 41-43):

Bottom Up/Top Down Shades Corded & Cordless - page 41

Top Down Only Shades - page 41

Sun Up/Sun Down Shades - page 43

7. **SPECIALTY SHAPES** – Arches, Arch over Standard, Octagon, Hexagon, Trapezoids, Angled, Cut-outs, and Skylights, Corner windows, Bay windows and see pages 38-40 and 42-44.

8. **DELIVERY:** Indicate ship to address.

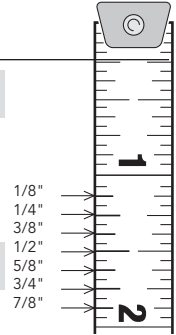

HOW TO PRICE YOUR ORDER

1. Select shade type, size, color and options.
2. Add together the base price for the shade and options to determine total price of the shade.

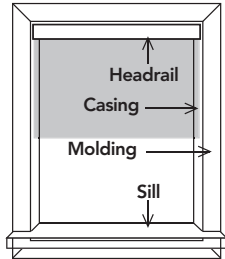

HOW TO MEASURE

TIPS AND TOOLS

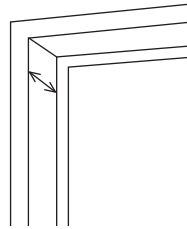

- Steel tape measure — do not use cloth measuring tape
- Round measurements to the nearest 1/8"
- Pencil
- Clearly record measurements – width vs. height
- Measure each window and identify window locations – size variances are common

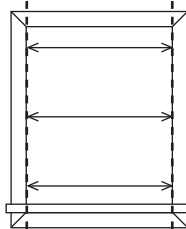

HOW TO MEASURE FOR AN INSIDE MOUNT

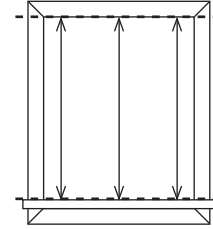

INSIDE MOUNT SHADE

DEPTH

WIDTH

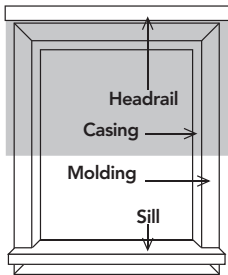

HEIGHT

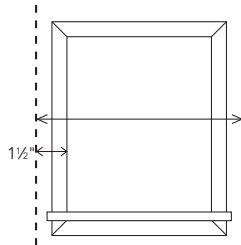

1. **Measure Depth:** To determine if window casing has enough depth for an inside-mount window treatment, see Size Considerations.
2. **Measure Width:** Measure the inside width of window casing in three places. Record narrowest measurement.
3. **Measure Height:** Measure the inside height from the top of window casing to top of sill in three places. Record longest measurement.

Note: Do not take any deductions for clearance. The manufacturer will take necessary deductions for a perfect fit.

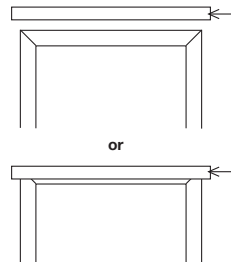

HOW TO MEASURE FOR AN OUTSIDE MOUNT (all shades except Slide-View™)

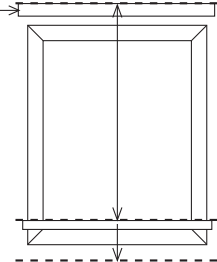

OUTSIDE MOUNT SHADE

WIDTH

HEADRAIL LOCATION

HEIGHT

1. **Measure Width:** Measure width to be covered. We recommend 1 1/2" overlap on each side (3" total) for optimum light control and privacy. Record measurement.
2. **Determine Headrail Location** Determine if headrail will be on molding or above molding and mark spot.
3. **Measure Height:** Measure height to be covered from top of headrail location to top of sill or lower if overlap is desired for light control and privacy. Record measurement.

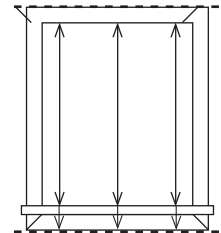

Note: The manufacturer makes NO deductions on outside-mount installations.

HOW TO MEASURE FOR AN OUTSIDE MOUNT – SLIDE-VUE™

1. **Measure Width:** Measure width to be covered. Add 3" for each side (6" total overlap) to ensure light control and privacy.
2. **Measure Height:** Measure from top edge of molding to bottom edge, or to top of sill if there is one. Add 3" to allow for adequate mounting area above the window.
3. If shade extends to floor (i.e. to cover patio door), measure height in three places, take the smallest measurement and deduct at least 1/2" for clearance so the fabric does not touch the floor.

NOTE: The factory makes NO allowances on outside mount.

If you want the entire window uncovered when the shade is fully open, you may need to add more than 6" to the width. See Slide-View™ Stacking Charts on page 46 for more information.

HEIGHT

GRABER® CRYSTALPLEAT® FEATURES & BENEFITS

FEATURES	BENEFITS
Nonwoven Material	Will not fray
Soft Fabric	Attractive yet durable and feels like cloth Shade operates quietly
Energy Efficient Cellular Construction	Lower heating and cooling costs by keeping heat and cold out while maintaining constant room temperatures
Color-Coordinated Components	Attractive shade appearance with fabric color coordinating with headrails, bottomrails and components
Variety of Colors	Complements any room decor
Shade Blocks UV Rays	Protects home furnishings, artwork and carpet from harmful UV rays
Pleat Retention	Crush resistant pleats look full not flat
Exclusive Pleating Process	Built-in quality with a continuous piece of material (all styles except Scroll and Solitude)
Stay Clear Glue Bead	Non-yellowing glue provides built-in strength so pleats do not separate

SPECIALTY SHADE SPECIFICATIONS & PRICING

PERFECT ARCH – HALF CIRCLE

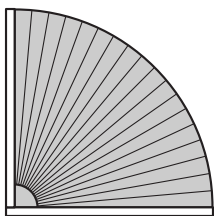

- Perfect arches are those where the radius of the circle is constant at all points
- Perfect arches do not require a template
- Include width and height measurements on all orders
- For inside mount, measure inside of window frame
- For outside mount, add the desired amount of overlap to your measurements
- Minimum width is 9" exact, minimum height 4½"
- Arches are stationary
- Outside mount brackets will be visible
- Side mounts available up to 60" wide exact

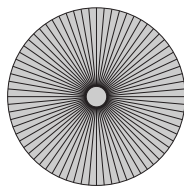

HALF CIRCLE

QUARTER CIRCLE, FULL CIRCLE & NON-PERFECT ARCHES

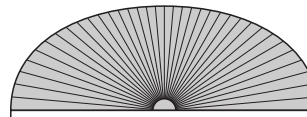

QUARTER CIRCLE

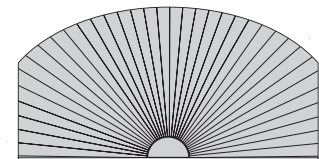

FULL CIRCLE

PALLADIAN (TOMBSTONE)
(Template Required)
Not to scale

EYEBROW ARCH
(Template Required)

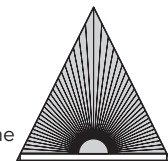

ELONGATED ARCH
(Template required)

- All non-perfect arches require a template (see page 39); non-perfect arches are not constant at all points; deviation of ¼" makes it imperfect
- Include width and height measurements on all orders
- For inside mount, measure inside of window frame
- For outside mount, add the desired amount of overlap to your measurements
- All arches are stationary
- Minimum width 9" exact, minimum height 4½"
- Outside mount brackets will be visible
- Side mounts available up to 60" wide exact

Maximum Sizes:

- Half Circle – 84" width, 42" height
- Quarter Circle – 47" width, max. height is 1.5 times the width
- Full Circle – 36" overall width (9" exact minimum width)
- Palladian, Elongated, Eyebrow & Triangle – max. width 84" (4½" exact minimum width)
max. height 60% of width, min. height 20% of width
