SHEER SHADES

Product Information Guide

Bali
your home, your style

SEPTEMBER 2021

Features

Sheer Shades

- Two layers of fabric encase lightweight fabric vanes for effortless light control
- The sheer softens incoming light and helps filter out harmful UV rays while providing an outside view
- The Light filtering sheer shades allows soft light to flow through while providing privacy
- Smaller vanes are often better for smaller-sized windows while larger vanes work best for larger windows and have the added advantage of providing more view-through
- Shades block up to 99% of UV rays when closed

Features	Benefits
Continuous-Loop Lift	• Cord and clutch system makes raising and lowering shade easy • Cord remains at same length, regardless of shade position • Choose left or right cord location • Color coordinated cords
Motorized Lift	• Window treatments can be operated from virtually anywhere in the home • Easily operate hard-to-reach or large window coverings • Operate multiple window treatments simultaneously or individually
Fabric-Wrapped Cassette	• Fabric-wrapped cassette (standard) creates a cohesive appearance in the window
Warranty	• Limited lifetime warranty and five-year warranty on motorization components

Features

Light Control and Privacy

Light Filtering*: Allows light to gently filter through and provides privacy. Images and shapes may be seen through these shades, but details are not visible. Deep fabric colors provide moderate light control, while light colors provide lower light control. **Privacy level: moderate**

Room Darkening: Allows some light to filter into the room and provides privacy. Objects in a lit room seen through these shades appear as vague shapes. Deep fabric colors darken a room; light colors filter and diffuse bright sunlight. **Privacy level: complete**

Light Gaps: For optimal light, outside mount is recommended, or you may add a secondary soft window treatment (drapery or curtain) to hide the light gap on an inside mount. **Privacy level: moderate**

*These fabrics are translucent and their colors may be influenced by changing light conditions. Colors may appear to vary depending upon the time of day and type of lighting, as well as whether the shade is partially or fully open.

Fabric Recommendations

Order all shades for the same room at the same time to ensure color consistency and to minimize dye lot variation. For side-by-side sheer shades, request vane alignment. Vanes can be aligned to within ¼".

NOTE: Shades must be ordered at the same time with the same fabric style and height.

Light Gap

The fabric width is narrower than the finished shade width of the tube and its components. See chart below for light gap.

Control Type	Control End		Idle End	
	Inside Mount (inches)	Outside Mount (inches)	Inside Mount (inches)	Outside Mount (inches)
Continuous-Loop Lift	1¹⁄₁₆	1	¹¹⁄₁₆	⅝
Motorized Lift	1	¹⁵⁄₁₆	¹¹⁄₁₆	⅝

Fabric Disclaimers

Due to the nature of the weaving process, some imperfections in the weave are normal. Fabric appearance can vary based on changing light conditions in the room.

Cleaning and Care Information

Regular light dusting with a feather duster, vacuum with low suction, or a hairdryer on a cool temperature.

Fabric Certifications

Oeko-Tex® Standard 100 certifies that our fabrics are free of PVC, halogen, lead, formaldehyde, allergenic dyes, pesticides, phenols, heavy metals, and meet all VOC content limits.

Options

Summary (for surcharges and pricing refer to price charts)

Below is a list of options for sheer shades. All options are available in all styles and colors. See detailed descriptions on the following pages.

Control Type Options
- Continuous-loop lift
- Motorized lift (see motorization product information guide)

Shade Options—No Charge
- Bottomrail and end cap colors
- Bay and corner windows
- Cord length (must specify different length)
- Cord location
- Projection brackets 3¼" and 4"
  - 3¼" projection brackets add up to 2⅛" extension from wall
  - 4" projection brackets add up to 2⅞" extension from wall

Shade Options—Surcharge
- Motorization (see motorization product information guide)

Projection Brackets
- **No charge**
- Available with continuous-loop lift and motorized lift
- Two sizes: 3¼" and 4"
- 3¼" projection brackets add up to 2⅛" extension from wall
- 4" projection brackets add up to 2⅞" extension from wall

Options

Continuous-Loop Lift Control

- **Standard**
- Cord loop and clutch system makes raising and lowering shade easy
- Special cord loop length must be requested at time of order
- Cord remains at same length regardless of shade position
- Color coordinated cord loop and cord guide
- Safety cord guide keeps the cord out of the reach of children and pets to enhance safety
- Choose left or right cord location
- Outside mount is recommended for maximum light control

NOTE: Cord guide must be installed to operate shade.

Inside Mount Light Gap
Refer to Light Gap Chart

Motorized Lift

- **See motorization product information guide for additional options and pricing**
- Down position will have vanes open; in the HOME position, the shade is lowered with the vanes closed
- Allows for easy operation of hard-to-reach or large window coverings
- Efficiently manages energy (heat gain and loss)
- Motorized lift shades are cordless and are a safer choice for homes with children or pets
- Low-voltage motorization requires no costly electrical hardwiring
- Powered with battery or plug-in transformer
- Motor located on the left or right side, standard on the right

NOTE: Motorization components and accessories have a five-year limited warranty, excluding batteries.

Options

Corner Windows

Shades on Corner Windows

- **No charge**
- Made as individual shades
- Each shade will have its own control; we recommend opposite corners
- Indicate for each shade whether butt or bypass
- Bypass shade is mounted into the corner; butt shade is butted to the other shade
- Manufacturer will take appropriate deductions for proper fit; DO NOT order as a corner shade if you do not want manufacturer to take deductions
Measuring Information

Mounting on a Wall or Molding:

Measure the width of each window from the corner on the mounting surface (molding or wall) to the point you would like to cover.

Mounting Above the Molding:

Measure the width of each window from the corner on the mounting surface to the point you would like to cover.

Projection measurement is the distance needed to clear any molding or obstructions that the shade will be mounted above.

NOTE: The projection (P) distance is needed to correctly calculate deductions for installations where the shades will use shims or projection brackets to clear molding. All projection distances must match for correct deductions to be calculated.

Adjacent Shadings

To cover wide window openings, window shadings may be installed end to end so that the cassette headrails touch. The gap between the fabric panels of the adjacent shading varies by the control placement as shown in the chart.

Control Placement for Adjacent Shades			
Control Placement		Gap	
Left Shade Control	Right Shade Control	Continuous-Loop Lift (inches)	Motorized Lift (inches)
Right	Right	1¾	1¹¹⁄₁₆
Left	Left	1¾	1¹¹⁄₁₆
Right	Left	2⅛	2
Left	Right	1⅜	1⅜

Side-by-Side Alignment
Vane alignment to within ¼" is available upon request only for shades ordered at the same time with the same fabric style and height. Add note in special instructions.

Options

Bay Windows

Shades on Bay Windows

- **No charge**
- Made as individual shades
- Each section will have its own control
- Manufacturer will take appropriate deductions for proper fit; DO NOT order as a bay window shade if you do not want manufacturer to take deductions

Measuring Information: Three-Sided Bay Window

Mounting on a Wall or Molding. Shown without Projection.
Measure:

L and R: Width of each side window from the corners on the mounting surface to the point you would like to cover.

C1: Width of the center window on the mounting surface from corner to corner.

Angle L-C1: Angle between the (L) and (C1) windows.
Angle C1-R: Angle between the (C1) and (R) windows.
Projection: If needed: The depth of the trim or molding the shade will be mounted above.

Measuring Information: Four-Sided Bay Window

Mounting Above the Molding. Shown with Projection.

L and R: Width of each side window from the corners on the mounting surface to the point you would like to cover.
C1, C2: Width of each center window on the mounting surface from corner to corner.

Angle L-C1: Angle between the (L) and (C1) windows.
Angle C1-C2: Angle between the (C1) and (C2) windows.
Angle C2-R: Angle between the (C2) and (R) windows.
Projection: If needed: The depth of the trim or molding the shade will be mounted above.

NOTE: The projection (P) distance is needed to correctly calculate deductions for installations where the shades will use shims or projection brackets to clear trim or molding. All projection distances must match for correct deductions to be calculated.

For additional windows on bays with up to five sides, continue with number progression for center shade sizes (C1, C2, C3, …) and angles (angle C1-C2, angle C2-C3, …) as needed.

Measure each bay angle using a protractor, or angle finder, or use two business cards in each bay corner as illustrated above and fax to customer service.
The angle to use between adjacent center bay windows along a straight section of wall is 180 degrees.

General Information

Continuous-Loop Lift

Shade Operation
A. To lower, pull down on the back cord.
B. Continue to pull on the back cord when fully lowered to open the vanes. Over rotation will occur if you continue to pull when the vanes are fully opened. The bottomrail will face into the room if over-rotated.
C. To close, pull the front cord. Continue to pull on the front cord to raise the shade.

A.   B.   C.

Open Vanes

1¼"	1⅜"	2⅜"
2" Vane Size	2¾" Vane Size	3" Vane Size
General Information

Continuous-Loop Lift
Closed Vanes

When closed, the vanes of sheer shades overlap providing privacy. Sheer shades may have light gaps towards the bottom of the shade.

Importance of Correct Shade Height

The bottomrail pivots when the vanes are opened and closed as shown below. The proper height measurement is critical in applications where the window shading closes just above a window sill or floor. If the window shading is too long and the bottomrail rests on the sill or floor when it is fully lowered, the rail cannot pivot freely and the vanes cannot be opened properly.

To Close Vanes   To Open Vanes

General Information

Continuous-Loop Lift Product Detail

Projection Bracket (optional)
- Medium 3¼"
- Long 4"

Fabric-Wrapped Cassette
- Standard

Installation Bracket
- Shade can be top or back mounted only

Cassette End Cap
- Provides a finished look to the shade

Continuous-Loop Lift Cord Control
- Length remains the same regardless of shade position
