

Bali® DiamondCell™ Cellular Shades

Product Information Guide and Price List for
single and double cell cellular shades

April 2012

 **Bali**®
your home, your style

Shade Features

Bali® DiamondCell™ Cellular Shades are made from a variety of luxurious spunlace, point-bond or woven fabrics. These shades are highly energy efficient due to the pockets of air formed by the cellular design. The DiamondCell collection is the perfect combination of function and fashion, providing energy efficiency while stylishly covering your windows.

- Highly energy-efficient fabric (see Energy Performance)
- Solutions for numerous privacy and light-control needs
- Offered in three cell sizes to match diverse decor styles
- Broad spectrum of on-trend colors to enhance every room
- All shade components are color coordinated

Fabric Styles and Information: Cellular Shades

FABRIC STYLE		Level of Light Control and Privacy	Fabric Content
Confetti	⅜" Double Cell	Light Filtering	100% Polyester Spunlace
Daybreak II	⅜" Double Cell	Light Filtering	100% Polyester Point Bond
Eternity	⅜" Single Cell	Light Filtering	100% Polyester Spunlace
	¼" Single Cell	Light Filtering	100% Polyester Spunlace
Gallantry	⅜" Single Cell	Room Darkening	75% Polyester, 25% Wood Pulp Spunlace
Medieval	⅜" Single Cell	Light Filtering	100% Polyester Woven
Midnight	⅜" Double Cell	Blackout	100% Polyester Spunlace with Concealed Metallic Liner
	⅜" Single Cell	Blackout	100% Polyester Spunlace with Concealed Metallic Liner
Northern Lights	⅜" Double Cell	Light Filtering & Room Darkening	100% Polyester Spunlace
Sheer Bliss	⅜" Single Cell	Sheer	100% Polyester Woven
Double Solitaire™ II	⅜" Double Cell	Light Filtering	100% Polyester Point Bond
Solitaire™ II	⅜" Single Cell	Light Filtering	100% Polyester Point Bond
Storm	⅜" Double Cell	Light Filtering & Room Darkening	100% Polyester Spunlace
Textures	⅜" Single Cell	Light Filtering	100% Polyester Spunlace
Tinted Whites	⅜" Double Cell	Light Filtering	100% Polyester Spunlace
	⅜" Single Cell	Light Filtering	100% Polyester Spunlace
	¼" Single Cell	Light Filtering	100% Polyester Spunlace

Light Control and Privacy

Sheer: Allows light to enter the room where light control and privacy are not a concern. Objects in the room can be seen quite clearly through shades.

Light Filtering*: Gently diffuses incoming light to provide some light control and moderate privacy.

Room Darkening*: Significantly dims light entering the room. Deeper fabric colors offer more light control and moderate privacy.

Blackout: Blocks all light from entering the room. All fabric colors provide maximum light control and complete privacy.

***These fabrics are translucent and their colors may be influenced by changing light conditions. Colors may appear to vary depending upon the time of day and type of lighting, as well as whether the shade is partially or fully lowered.**

Shade Features

Energy Performance

Bali® Cellular Shades are the smart choice for every window in your home. For year-round comfort, Bali Cellular Shades effectively insulate your windows from the heat and cold. Regardless of climate, they are our most versatile and energy efficient window treatment available.

Bali Midnight is constructed with Tri-sulation™ fabric. Three layers made up of a Mylar® liner sealed between two layers of soft, high quality 100% spunlace fabric. This unique design forms a soft, thick barrier of insulation. Independent tests prove Bali Midnight ¾" Double Cell fabric is one of our most energy efficient fabrics on the market.*

Block the Cold

Homes in colder climates benefit from Bali Cellular Shades' insulating properties to block out the cold and regulate inside temperatures.

Tri-sulation fabrics deliver a 22% reduction in heat transfer during the winter.*

Block the Sun

Homes in warmer climates benefit from Bali Cellular Shades' light-blocking properties to keep the heat from transferring to the inside.

Tri-sulation fabrics deliver a 56% reduction in heat transfer during the summer.*

*Values listed are for Midnight ¾" Double Cell. Based on third party testing, Architectural Testing Incorporated (ATI)

Mylar is a registered trademark of DuPont Tejin Films

Energy Efficiency Ratings

DOUBLE PANE LOW-E (DOUBLE GLAZING) WINDOW & WINDOW COVERING				
Fabric	R-Value (Higher is Better)	% Reduction Of Heat Transfer	SHGC (Lower is Better)	% Reduction Of Heat Transfer
Midnight ¾" Double Cell	4.76	22.20%	0.12	56%
Tinted Whites ¾" Single Cell	4.55	21.58%	0.12	57%
Midnight ¾" Single Cell	4.55	20.91%	0.12	56%
Confetti, Northern Lights, Storm, Tinted Whites ¾" Double Cell	4.55	20.84%	0.10	63%
Daybreak II & Double Solitaire II ¾" Double Cell	4.55	20.76%	0.15	48%
Eternity, Gallantry ¾" Single Cell	4.55	19.55%	0.14	49%
Textures ¾" Single Cell	4.55	19.17%	0.13	53%
Solitaire II ¾" Single Cell	4.55	18.89%	0.16	42%
Eternity, Tinted Whites ¾" Single Cell	4.39	16.00%	0.17	38%
Medieval ¾" Single Cell	4.00	10.28%	0.19	30%
Sheer Bliss ¾" Single Cell	4.00	10.28%	0.19	30%

NFRC 102 2010 performed by Architectural Testing Inc.

R-Value

R-Value indicates the effectiveness of the window covering at preventing energy from flowing to the outside. The higher the R-Value, the greater the insulating effectiveness.

Solar Heat Gain Coefficient (SHGC)

SHGC measures how well window covering blocks heat from the sun from flowing to the interior. SHGC is expressed as a number between 0 and 1. The lower the SHGC, the better a product is at blocking unwanted heat gain.

Shade Features

UV Protection

Bali® Cellular shades effectively block ultraviolet (UV) rays. Over exposure to the sun's UV rays can damage furnishings, wood floors, draperies, carpeting and artwork. The Ultraviolet Protection Factor (UPF) rating system measures the UV protection provided by the fabric.

Fabric	UPF Rating	% of UV Blockage
3/8" Double Cell: Confetti, Daybreak II, Double Solitaire II, Midnight, Northern Lights, Storm, Tinted Whites	50	99%
3/8" Single Cell: Eternity, Gallantry, Midnight, Solitaire II, Tinted Whites, Textures		
3/4" Single Cell: Eternity, Tinted Whites		
3/8" Single Cell: Medieval, Sheer Bliss	<15	71%

UPF Rating

The UPF Rating system measures the UV protection, both UVA and UVB provided by fabric. It is very similar to the SPF rating system used for sunscreens. UPF ratings range from 15 (good) to 50+ (excellent). Shade with a UPF of 50 blocks 99% of the UV radiation.

UV Blockage

UV Blockage is directly related to UPF and shows window covering's effectiveness at preventing ultraviolet rays from entering an interior. The percentage rating indicates the amount of UV rays blocked by the shade.

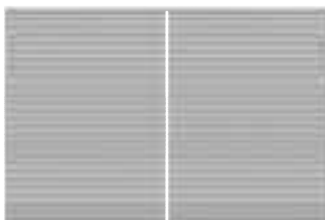

Sound Absorption

Bali Cellular shades absorb sound to make rooms comfortable and cozy. The noise reduction coefficient (NRC) represents the amount of sound energy absorbed by the shade. An NRC of 0 indicates perfect reflection; an NRC of 1 indicates perfect absorption.

Fabric	Sound Absorption (Higher is Better)
Midnight 3/8" Double Cell	0.45
Confetti, Northern Lights, Storm, Tinted Whites 3/8" Double Cell	0.60
Midnight 3/8" Single Cell	0.40
Eternity, Gallantry, Tinted Whites 3/8" Single Cell	0.55
Eternity, Tinted Whites 3/4" Single Cell	0.55
Daybreak II and Double Solitaire II 3/8" Double Cell; Solitaire II 3/8" Single Cell	0.45
Textures 3/8" Single Cell	0.40
Medieval, Sheer Bliss 3/8" Single Cell	0.30

Shade Options

Shade Options: For Surcharges and Pricing Refer To Pricing Section

The following is a list of options for Cellular Shades. Limitations will be based on fabric width. See detailed descriptions on the following pages.

CONTROL TYPE OPTIONS: see Price Charts for pricing and/or surcharges

- Standard Cord Controls
- Cordless
- Continuous-loop Lift System
- Motorization
- VertiCell™

SPECIALTY SHAPE SHADE OPTIONS: see Price Charts for pricing and/or surcharges

- Angled Top/Angled Bottom
- Arch over Standard
- Arches
- Octagon, Hexagon or Trapezoid

SHADE OPTIONS—NO CHARGE

- Cord Placement on Right or Left
- Corner or Bay Window
- Cut-outs
- Hold-down Brackets
- Projection Brackets:
 - with standard $\frac{3}{8}$ " Single and Double Cell, all Cordless, Continuous Loop and Motorized:
 - Long (adds up to $2\frac{1}{2}$ " extension from wall)
 - Medium (adds up to $1\frac{5}{8}$ " extension from wall)
 - Short (adds up to 1" extension from wall)
 - with standard $\frac{3}{4}$ " Single Cell:
 - Long (adds up to $1\frac{3}{4}$ " extension from wall)
 - Medium (adds up to $\frac{7}{8}$ " extension from wall)
 - Short (adds up to $\frac{1}{4}$ " extension from wall)
 - with VertiCell:
 - Long (adds up to $2\frac{1}{4}$ " extension from wall)
 - Medium (adds up to $1\frac{1}{4}$ " extension from wall)
 - Short (adds up to $\frac{3}{4}$ " extension from wall)
- Shims
- Side-mount Brackets—Inside Mount only
- Standard Cord Cleats – Clear

SHADE OPTIONS—SURCHARGE

- Bottom Up/Top Down—Corded
- Bottom Up/Top Down—Cordless
- Combination Shade—Corded
- Combination Shade—Cordless
- Cord Winder
- Decorative Cord Cleats
- Multiple Shades on One Headrail
- Sky Pole
- Skylight Blind
- Sun Up/Sun Down—Corded
- Sun Up/Sun Down—Cordless
- Top Down Only—Continuous-loop Lift
- Wood Cornice (See Cornice and Valance Tab)

Shade Options

Standard Cord Control

- **No charge**
- Standard cord control includes a color-coordinated cord
- Controls can be placed on the right (standard) or left side
- Optional safety cord cleats keep the cord out of reach of children and pets to eliminate dangling cord hazards
- Available as multiple shades on one headrail (standard gap 1/2")
- Side mounts available up to 60" wide by 96" high
- Cord length is approximately 1/3 of the shade height

Size Considerations

	Minimum Width*	Maximum Width	Minimum Height	Maximum Height
All Fabric Styles except Midnight Double Cell	9"	144"†	9"	144"
Midnight	9"	86"	9"	96"

* For all inside mount applications—3/8" deduction is taken by manufacturer on overall width.

† Based on fabric width.

Cordless Lift System

- **For surcharge, see Price Charts**
- Safest window shade; ideal for homes with children or pets
- Sky Pole available for hard to reach shades (48" or less in width)
- Side mounts available up to 60" wide
- Available as multiple shades on one headrail (standard gap 3/8")

Size Considerations

	Minimum Width*	Maximum Width	Minimum Height	Maximum Height
All Fabric Styles except Midnight Double Cell	17"	120"†	9"	86"
Midnight Double Cell	15 1/4"	48"	9"	64"

* For all inside mount applications—3/8" deduction is taken by manufacturer on overall width.

† Based on fabric width

For Shades Less Than Minimum Width:

If finished shade width is	Maximum Height of Shade
equal to 11 5/8" but less than 12"	18 1/2"
equal to 12" but less than 12 1/2"	23 1/4"
equal to 12 1/2" but less than 13"	29 1/2"
equal to 13" but less than 13 1/2"	35 3/4"
equal to 13 1/2" but less than 14"	42 1/8"
equal to 14" but less than 14 1/2"	48 3/8"
equal to 14 1/2" but less than 15"	54 5/8"
equal to 15" but less than 15 1/2"	61"
equal to 15 1/2" but less than 16"	67 1/4"***
equal to 16" but less than 16 1/2"	73 1/2"***
equal to 16 1/2" but less than 17"	79 3/4"***
17" or more	86"***

** Maximum height for Midnight Double Cell is 64".

your home, your style

baliblinds.com 11

Shade Options

Continuous-loop Lift

- **For surcharges, see Options Pricing**
- Recommended for larger, heavier shades
- The clutch mechanism in the color coordinated aluminum headrail assists in raising and lowering the shade; it stops the shade at any point and holds the bottomrail level
- A single, white continuous-loop cord raises and lowers the shade and keeps the cord the same length
- Continuous-loop Lift stacks the fully raised shade more compactly than a standard cord and holds it more securely
- Safety tensioner included; tensioner must be installed for shade operation
- Available as multiple shades on one headrail (standard gap ½")
- Available on Top Down Only specialty shades
- Side mounts available up to 60" wide by 96" high

Size Considerations

	Minimum Width*	Maximum Width	Minimum Height	Maximum Height
All Fabric Styles except Midnight	20½"	144"†	9"	144"
Midnight	17"	86"	9"	96"

* For all inside mount applications—¾" deduction is taken by manufacturer on overall width.

† Based on fabric width

For Shades Less Than Minimum Width:

If finished shade width is	Maximum Height of Shade
equal to 16⅝" but less than 17"	96¼"
equal to 17" but less than 17½"	100⅞"
equal to 17½" but less than 18"	107⅞"
equal to 18" but less than 18½"	113½"
equal to 18½" but less than 19"	119¾"
equal to 19" but less than 19½"	126"
equal to 19½" but less than 20"	132⅜"
equal to 20" but less than 20½"	138⅝"
20½" or greater	144"

Control length for Continuous-loop Lift shades varies based on the finished shade height (see below). Optional cord loop length (sizes listed in chart) can be specified at the time of order.

Finished Shade Height	Cord Loop Length
12" - 26"	18"
26⅞" - 38"	24"
38⅞" - 50"	36"
50⅞" - 62"	48"
62⅞" - 74"	60"
74⅞" - 96"	72"
96⅞" - 120"	84"
120⅞" - 130"	96"
130⅞" - 144"	108"

Optional cord lengths: 144" and 180"

Shade Options

Motorization

- **For surcharges, see Options Pricing**
- Window treatments can be operated from virtually anywhere in the home
- Provides easy operation of hard-to-reach or large windows
- Efficiently manages energy (heat gain and loss)
- Operate multiple window treatments simultaneously or individually
- Cordless motorization eliminates the strangulation hazard of products with accessible operating cords
- Easily integrated with home-automation systems
- Low voltage motorization requires no costly electrical hard-wiring
- Motor located on right side within the head rail
- Powered with Battery Wand or Transformer
- RF (Radio Frequency) only
- Multiple Shades on One Headrail available; each panel will have a motor
- Not available with Bottom Up/Top Down, Top Down Only, Sky Track or Specialty Shapes
- Not available with hold-down brackets

Multiple control options available

- Remote: convenient, portable control (single or five channel available)
- Wall switch: control shades/blinds when entering or exiting a room with the simple push of a button
- Timer: Allows you to program operation at certain times of the day
 - To manage heat loss and gain automatically — a great way to reduce your energy bill in any season
 - To protect furniture from UV rays
 - To improve security by making your home look occupied when you're away

NOTE: Motorization components and accessories have a five-year limited warranty; excludes battery wands and batteries

Size Considerations	Minimum Width*	Maximum Width	Minimum Height	Maximum Height

** Maximum height for Midnight Double Cell is 64".

Shade Options

Combination Shade: Corded

Similar to Sun Up/Sun Down, fabrics are combined to create shades with varying degrees of privacy and light control, with pleated fabric on top and cellular fabric on bottom.

- **For Pricing, see Price Charts**

- Standard control is right control — operates bottomrail, while left control operates intermediate rail (can be reversed)
- Headrail and intermediate rails coordinate with top fabric
- Bottom rail coordinates with bottom fabric
- Not available with Cut-outs, overlap or liners
- Neat Pleat® shades offer a unique back ladder support; pleats will not sag or flatten out for the life of the shade
- Multiple Shades available as Two on One Headrail only (standard gap ½")

NOTE: Avalon and Statement are available with Neat Pleat only; not available with Shoreline, Spencer and Spectrum.

Size Considerations

	Minimum Width*	Maximum Width	Minimum Height	Maximum Height
Standard Pleat	12"	72"***† as Single Shade 144" as two on one	12"	96"†
Neat Pleat		72"***† as Single Shade 120" as two on one		

* For all inside mount applications—¾" deduction is taken by manufacturer on overall width

**Maximum single shade width is 72" or maximum fabric width, whichever is smaller.

† Single shade maximum width with Midnight Double Cell is 40", maximum height is 72"

Shade Options

Combination Shade: Cordless

Similar to Sun Up/Sun Down, fabrics are combined to create shades with varying degrees of privacy and light control, with pleated fabric on top and cellular fabric on bottom.

- **For Pricing, see Price Charts**
- Cordless shades are the safest window shade alternative; Ideal for homes with children and pets
- Not available with Cut-outs, overlap or liners
- Antique Satin, Reflections and Social are not available with Cordless
- Neat Pleat® shades offer a unique back ladder support; pleats will not sag or flatten out for the life of the shade
- Headrail and intermediate rails coordinate with top fabric
- Bottom rail coordinates with bottom fabric
- Not available with Multiple Shades on One Headrail
- All cordless Combination shades need to be used on windows where consumers can comfortably raise and lower the shade with their hands and have easy access. Very high windows should use the standard corded option, rather than cordless. Operation of shade requires both sets of handles be used to properly raise and lower rails

NOTE: Avalon and Statement are available with Neat Pleat only; not available with Shoreline, Spencer and Spectrum.

Shade Options

Cut-out Shades

Without Intermediate Rail

With Intermediate Rail

- **No charge**
- Only available with a standard corded shade
- If Cut-out width exceeds 1" or Cut-out height exceeds 6", there will be an intermediate bottomrail with a separate control to operate the bottom panel
- Maximum width Cut-out for shades less than or equal to 48" is 25% of the shade width; maximum Cut-out for shades over 48" is 12"
- When ordering Cut-out on each side of shade, both Cut-outs must be same width and height
- Available as bottom corner Cut-out only
- Cut-outs are measured from the bottom up
- Side mounts available up to 60" wide exact

Size Considerations

	Minimum Cut-out	Minimum Width*	Maximum Width†	Maximum Height
All Fabric Styles	1/16"	18"	144"	96"

† Based on fabric width.

* For all inside mount applications—1/8" deduction is taken on overall width

Skylights

Side Channel

Side Channel

Sky Pole

- **For surcharge, see Options Pricing**
- Widths over 30 3/4" will have a center cord visible when the shade is open
- Includes white aluminum side channels
- Operates with handle on center rail
- Brackets will be visible on an outside mount
- Skylight poles are telescoping and available upon request
- Side mounts not available
- Window top and bottom corners must be 90°
- Not available with Continuous-loop Lift, Cordless Lift, Motorization or 3/4" Single Cell fabrics

Size Considerations

	Minimum Width	Maximum Width*	Minimum Height	Maximum Height*
All Fabric Styles	12 3/4"	61"	12"	61"

*For a width of 30 3/4" or less, maximum shade height is 96".

Sizes available: 3-6 1/2 feet and 5-9 1/2 feet

Shade Options

Corner Windows

- **No charge**
- Made as individual shades
- Each shade will have its own control, we recommend opposite corners
- Indicate for each shade whether left or right and butt or bypass
- Bypass shade is mounted into the corner; butt shade is abutted to the other shade
- Manufacturer will take appropriate deductions for proper fit. **DO NOT** order as a Corner shade if you do not want manufacturer to take deductions.
- **Cornices or Decorative Wood Valances are not available on corner windows**
- For Bottom Up/Top Down and Sun Up/Sun Down corded shades the corner controls will be hard to reach
- For VertiCell™ Cellular shades, the handles between the Bypass and Butt shades will be offset 3¾" from each other for ease of operation

Measuring Information

Mounting on a Wall or Molding

Measure the width of each window from the corner on the mounting surface (molding or wall) to the point you would like to cover.

Mounting Above the Molding:

Width of each window from the corner on the mounting surface to the point you would like to cover.

Projection measurement is the distance needed to clear any molding or obstructions that the shade will be mounted above.

Note: The Projection (P) distance is needed to correctly calculate deductions for installations where the shades will use shims or projection brackets to clear molding. All projection distances must match for correct deductions to be calculated.

Shade Options

Bay Windows

- **No charge**
- Made as individual shades.
- Each section will have its own control
- Manufacturer will take appropriate deductions for proper fit. DO NOT order as a Corner shade if you do not want manufacturer to take deductions.
- **Cornices or Decorative Wood Valances are not available on corner windows**
- For Bottom Up/Top Down and Sun Up/Sun Down corded shades, depending on the angle, controls may be hard to reach.
- For VertiCell™ Cellular shades there is a light gap between adjacent side rails.

Measuring Information: Three-sided Bay Window

Measure:

L and R: Width of each side window from the corners on the mounting surface to the point you would like to cover.

C1: Width of the center window on the mounting surface from corner to corner.

Angle L-C1: Angle between the (L) and (C1) windows.

Angle C1-R: Angle between the (C1) and (R) windows.

Projection: If needed: The depth of the trim or molding the shade will be mounted above.

Measuring Information: Four-sided Bay Window

L and R: Width of each side window from the corners on the mounting surface to the point you would like to cover.

C1, C2: Width of each center window on the mounting surface from corner to corner.

Angle L-C1: Angle between the (L) and (C1) windows.

Angle C1-C2: Angle between the (C1) and (C2) windows.

Angle C2-R: Angle between the (C1) and (C2) windows.

Projection: If needed: The depth of the trim or molding the shade will be mounted above.

Note: The Projection (P) distance is needed to correctly calculate deductions for installations where the shades will use shims or projection brackets to clear trim or molding. All projection distances must match for correct deductions to be calculated.

For additional windows on bays with up to five sides continue with number progression for center shade sizes (C1, C2, C3, ...) and angles (Angle C1-C2, Angle C2-C3, ...) as needed.

Measure each bay angles using a protractor or angle finder or use two business cards in each bay corner as illustrated above and fax to customer service.

The Angle to use between adjacent center bay windows along a straight section of wall is 180 degrees.

86⅞ – 98"	15"	42"
98⅞ – 108"	34"	49"
108⅞ – 120"	46"	50"

NOTE: Handle height is to center of handle.

General Information

Standard Corded Shade Product Detail

1. Aluminum Headrail & Bottomrail

- Color coordinated to fabric
- Extremely durable

2. Flush-Mount End Caps

- Color coordinated to fabric
- Sleek look and tighter fit

3. Cord Lock

- Sleek, streamlined design
- Color coordinated to fabric
- Free-floating serrated cord locking roller for dependable operation

4. Hidden Snap-In Brackets

- Zinc-plated spring steel for easy installation
- Extension brackets also available

5. Stop Tassel

- Offers flexibility for minor length adjustment
- Color-coordinated to fabric

6. Fabric Styles

- All provide superior energy efficiency and light control with our unique double cell design

7. Joiner Ball and End Ball

- Color coordinated to fabric

8. Hold-Down Brackets (optional)

- Secures shade to doors, walls and window sills

9. Cord Management Options

- Clear cord cleat
- Cord winder
- Decorative cord cleat (solid brass or antique brass)

10. Projection Brackets (optional)

- 3/8" Single and Double Cell:
 - Long (adds up to 2 1/2" extension from wall)
 - Medium (adds up to 1 1/2" extension from wall)
 - Short (adds up to 1" extension from wall)
- 3/4" Single Cell:
 - Long (adds up to 1 3/4" extension from wall)
 - Medium (adds up to 7/8" extension from wall)
 - Short (adds up to 1/4" extension from wall)

11. Side Mount Brackets (optional)

General Information

Cordless Product Detail

Note: $\frac{3}{8}$ " Double Cell shown

1. **Aluminum Headrail and Bottomrail**
 - Color coordinated to fabric
 - Extremely durable
2. **Hidden Snap-In Brackets**
 - Brass-plated spring steel for easy installation
 - Optional extension or side mount brackets available
3. **Cellular Fabric**
 - Variety of cell sizes
 - Soft to the touch
 - Cell construction provides superior energy efficiency and light control
4. **End Caps**
 - Flush mount for a trim, smooth fit
 - Color coordinated to fabric
5. **Dust Cover**
 - Reduces build-up of dust and debris
6. **Internal Cord Lift System**
 - Prevents cords from tangling or twisting
 - Gear drive for a smooth operation and long lasting life
7. **Handle(s)**
 - Keeps the shade clean; a simple push or pull raises or lowers the shade evenly
8. **Hold-Down Brackets (optional)**
 - Secures shade to door, wall or window sills
9. **Projection Brackets (optional)**
 - Long (adds up to 2½" extension from wall)
 - Medium (adds up to 1½" extension from wall)
 - Short (adds up to 1" extension from wall)
10. **Side Mount Brackets (optional)**

NOTE: All cordless shades need to be used on windows where consumers can comfortably raise and lower the shade with their hands and have easy access. Suggest adding a sky pole for hard-to-reach applications, up to 48" wide.

General Information

Continuous-loop Lift System Product Detail

1. **Continuous-loop Control Cord (white)**
 - Length stays consistent regardless of shade height
2. **Aluminum Headrail and Bottomrail**
 - Color-coordinated to fabric
 - Extremely durable
3. **Hidden Snap-In Brackets**
 - Brass-plated spring steel for easy installation
 - Optional extension or side mount brackets available
4. **Safety Cord Loop Tensioner**
 - Prevents cord from twisting
 - Tension device must be installed for proper shade operation and safety
5. **Hold-Down Brackets (optional)**
 - Secures shade to doors, walls and window sills
6. **Dustcover**
7. **Projection Brackets (optional)**
 - Long (adds up to 2½" extension from wall)
 - Medium (adds up to 1½" extension from wall)
 - Short (adds up to 1" extension from wall)
8. **Side Mount Brackets (optional)**

General Information

Bottom Up/Top Down Corded Shade Product Detail

1. Aluminum Intermediate Rail and Bottomrail
 - Color-coordinated to fabric
 - Extremely durable
2. Aluminum Headrail with Extension Lip
 - Color-coordinated to fabric
 - Eliminates any light gap where center rail and headrail meet
3. Hidden Snap-In Brackets
 - Zinc-plated spring steel for easy installation
4. Pull Cord
 - Allows for conventional shade operation
5. Joiner Ball and End Ball
 - Color-coordinated to fabric
6. Hold-Down Brackets (optional)
 - Secures shade to doors, walls and window sills
7. Cord Locks
 - Sleek, streamlined design
 - Color coordinated to fabric
 - Free-floating serrated cord locking roller for dependable operation
8. Cord Management Options
 - Clear cord cleat
 - Cord winder
 - Decorative cord cleat (solid brass or antique brass)

NOTE: See page 30 for Projection and Side Mount Brackets.

General Information

VertiCell™ Shade Product Detail

1. **Aluminum Headrail**
 - Available in White Satin, Cream, Milk Chocolate
 - Extremely durable
 - Sleek, streamlined design
2. **Aluminum Side Rails**
 - Available in White Satin, Cream, Milk Chocolate
 - Extremely durable
 - Safety hinge to prevent shade damage
3. **Locking Handles**
 - Move side rails to open or close shade
 - Ease of operation
 - Lock rails in place
4. **Headrail Endcap**
 - Color coordinated to headrail
 - Provides a finished appearance
5. **Cellular Fabric**
 - Available with all styles and cell sizes
 - Superior energy efficiency
6. **Mounting Brackets**
7. **Safety Release Fabric Stem (not shown)**
 - Releases from carriage to prevent fabric from tearing
8. **Cornice or Valance (optional – not shown)**
 - Refer to the cornice and valance tab of the price list for pricing and product specifications
9. **Projection Bracket**
 - Long (adds up to 2¼" extension from wall)
 - Medium (adds up to 1¼" extension from wall)
 - Short (adds up to ¾" extension from wall)

APPLICATION:

- Ideal for patio doors, wide windows and room dividers
- Moveable side rails with locking handles for ease of operation
- Allows stack of material to be positioned on the right, center or left
- Easy to install
- Slim, compact stack

General Information

VertiCell™ Rail Colors

Aluminum headrail and side rails available in the following colors: White Satin, Cream, Milk Chocolate (**all rails must match**). Rail color choice must be selected when ordering shades. Suggested rail color coordination is White Satin or Milk Chocolate for the fabric colors listed below. **All other fabrics suggested rail color coordination is Cream.**

General Information

Warranty

Type of Warranty

Limited Lifetime on

- Natural Shades, Roller Shades, Solar Shades, Roman Shades, Cellular Shades, Pleated Shades, Sliding Panels and painted or stained cornices (unfinished cornices are not warranted).

Three year on

- Pleated shades without looped tape.

What is Covered

This product is warranted against original defects in materials or workmanship for as long as the original purchaser owns the product provided that:

- the product was properly installed
- the product was made or assembled exclusively from Springs Window Fashions' materials and components
- Springs Window Fashions' recommendations were followed with regard to limitations and specifications

Who is Covered

This warranty extends only to you as the original purchaser of the above stated product.

Obligations to the Consumer

The obligations of Springs Window Fashions are limited to the repair or replacement of parts or products found to be defective.

Springs Window Fashions is not responsible for shipping costs or labor costs, for measuring and taking the product down or for remeasuring or reinstalling the product.

If repairs are made under this warranty, the repairs will be made with like or similar parts.

Motorization

Components and accessories have a five-year limited warranty. Batteries not included.

What the Warranty Does Not Cover

This warranty does not cover conditions or damages caused by abuse, accidents, alterations, misuse or failure to follow instructions for measurement, installation, use, cleaning or maintenance.

Normal wear and tear, including but not limited to the items or occurrences below, is not covered by the warranty:

- Unfinished cornices
- All fabrics can lose original intensity after long exposure to the sun
- When left for extended periods in direct sunlight, plastics tend to yellow or crack
- Some loss of color intensity or discoloration may occur in plastic materials or wood finishes when exposed to direct sunlight over long periods of time
- Colors may vary from lot to lot and may not exactly match samples of previous purchases
- All cords will eventually wear out

Springs Window Fashions considers these items or occurrences normal wear and tear and they are not covered by this warranty.

THIS WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WRITTEN OR ORAL WARRANTIES OR OBLIGATIONS AND LIABILITIES.

No person is authorized to extend or alter this warranty.

SPRINGS WINDOW FASHIONS SHALL HAVE NO LIABILITY WHATSOEVER FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES.

Some states do not allow the exclusion or limitation of incidental or consequential damages, so this limitation or exclusion may not apply to you.

Service

Warranty claims must be accompanied by the original sales receipt as well as details regarding the nature of the problem, location of the product, etc. To obtain warranty service contact:

Customer Service Center
Springs Window Fashions, LLC
8467 Route 405 Highway South
PO Box 500
Montgomery, PA 17752-0500

You may also email:
windowfashions@springswindowfashions.com
Or call 1-800-221-6352

Cleaning Instructions

Bali Cellular Shades are easy to keep looking fresh and new for years. Regular dusting with a feather duster is recommended. When necessary, fabric can be lightly vacuumed with a brush attachment.

If the cellular shades become soiled with topical dirt (i.e. dirt that is resting on the surface of the fabric), we recommend that the shade be spot cleaned using a soft rag or sponge, with a mild detergent and warm water. Do not use strong detergents or spot removers. Extra care should be used when cleaning Midnight fabric as the fabric could be permanently creased.

Dry cleaning is not recommended and is not covered by warranty.

Professional blind cleaners use a variety of methods to clean blinds and vary in their capabilities. While Springs Window Fashions knows that many of our window treatments can be safely cleaned using the appropriate ultrasonic or injection/extraction cleaning methods we cannot guarantee the outcome of any cleaning services provided by an independent company.

For assistance in locating a certified blind cleaner that serves your area, visit www.blindcleaners.net or contact Customer Service at 800-221-6352.

RF Timer. Controls one or more blinds functioning on the same channel manually or at predetermined times	\$311

Options Pricing

Radio Frequency RemoteControls

Single Channel RF Remote: White

Single Channel RF remote is compatible with all Radio Frequency Motors. Use to control a single shade or group of shades performing the same function from up to 65 ft. away. It is compatible with RF wall switches and the RF timer. A great way to operate shades without a direct line of sight.

Five Channel RF Remote: White

Five Channel RF remote is compatible with all Radio Frequency Motors. Use to control multiple shades independently, in a group setting, or multiple groups from up to 65 ft. away. It is compatible with RF wall switches and the RF timer. Perfect for controlling shades in multiple rooms.

Radio Frequency Wall Switches

Single Channel RF Wall Switch: White or Ivory, Wirefree

Single Channel RF wall switch is compatible with all Radio Frequency Motors. It provides the same functions as the Single Channel RF Remote with the convenience of a wall switch. Wall switch is battery operated so there is no hardwiring required. Available in two colors to match your home's existing light switches.

Five Channel RF Wall Switch: White or Ivory, Wirefree

Five Channel RF wall switch is compatible with all Radio Frequency Motors. It provides the same functions as the Five Channel RF Remote with the convenience of a wall switch. Wall switch is battery operated so there is no hardwiring required. Available in two colors to match your home's existing light switches.

Radio Frequency Wireless Timer

RF Wireless Timer

The digital timer is compatible with all Radio Frequency Motors. The timer can be programmed to automatically operate blinds at a predetermined time each day or at different times every day of the week. The astronomical (Cosmic) setting may be applied to automatically operate blinds in accordance to sunrise and sunset. Additionally, a security mode may be enabled to randomly operate blinds, simulating an occupied home while you are away; provides the ultimate control for your motorized blinds. When using timer with multiple blinds, all blinds will operate the same.

Radio Frequency Power Source

12 Volt Reloadable Battery Wand

Requires 8 AA Lithium Batteries; can order with or without batteries. Includes 10" removable lead wire and wall mount clips. Shades greater than 3600 sq. in. require two single battery wands (dual wands). Dual wands include a connector when ordered. Dimensions: 18" long by 1 1/4" round.

12 Volt DC Plug-in Transformer

Eliminates the need for batteries. Available in white only. Power cord can be cut to desired length at time of installation.

- 12 Volt includes 10" removal lead and 25 ft power cord, it is 2" wide by 2 7/8" deep by 3" long; Output 12 volts, 2 amp
- 24 Volt includes 8 ft. removable lead and 15 ft power cord, it is 2 1/8" wide by 1 1/4" deep by 3 1/2" long; Output 24 volts 1.6 amp

RF = Radio Frequency; Radio Frequency can operate virtually anywhere in the home up to 65 feet; does not require the controller to be aimed at the motor for the blind to operate.
