

## LEVOLOR ${ }^{\circledR}$ Has the Right Solutions to Make Your Home More Comfortable

Use the LEVOLOR regional climate guide to find the ideal cellular solution to overcome regional climate challenges.
Product recommendations are listed by collection, light control, and energy options based on geographic region and climate challenge.

| Region | Climate Challenge Description | Product Recommendations |  |
| :---: | :---: | :---: | :---: |
|  |  | Premium Woven Fabrics | Value Fabrics |
| North | Cool, but sunny areas where it's important to allow the sun to heat the room to keep heating costs down. | Sheer Essence, Energy Shield, Single Cell | Tricot, Light Filtering, Double Cell |
|  |  | Linen, Energy Shield, Single Cell | Estria, Light Filtering, Double Cell |
| North and South Central | Transitional areas with cold and warm air where both heating and cooling costs are a concern. | Designer Textures, Light Filtering, Single Cell | Estria, Light Filtering, Double Cell |
|  |  | Heathered, Light Filtering, Single Cell | Tricot, Light Filtering, Double Cell |
| South | Warm, sunny areas where it's important to block the sun from heating the room. | Tree Bark, Room Darkening, Single Cell | Designer Colors, Room Darkening, Double Cell |
|  |  | Seclusions, Room Darkening, Single Cell | N/A |

## Understanding How LEVOLOR ${ }^{\circledR}$ Custom Cellular Shades Help Insulate Your Home

Windows provide a beautiful view to the world outside your home. They also account for a significant amount of your home's heating and cooling costs. A cellular shade complements the beauty of your home decor, while providing important benefits like insulation and eliminating unwanted air flow. LEVOLOR Custom Cellular shades aren't just stylish - they help keep your home more comfortable. Here's how:

Honeycomb Fabric Shape

- The fabric's honeycomb shape traps hot and cold air in cellular pockets reducing air flow into your home.

Double Cell Fabric Construction

- The Double Cell option features two layers of cells between your room and the window, providing an additional insulation barrier.

## Energy Shield"' Liner

- Our exclusive Energy Shield ${ }^{\text {mw }}$ liner is a thin, clear layer inside the cells that can provide additional year-round insulation.

Ultraviolet Protection Factor (UPF)

- How well your shade protects from solar UV rays, which can fade furnishings, floors and artwork. UPF ratings range from 15 (good) to 50 (excellent).

LEVOLOR is a member of the Attachments Energy Rating Council (AERC), whose goal is to help consumers make informed decisions about purchasing window attachments to maximize energy savings. Search "AERC" in your Internet browser for more information.

How To Measure Quickly and Accurately

INSIDE MOUNT (IM) INSTALLATION - For a beautiful framed look
(1) MEASURE WIDTH

Measure to the nearest $1 / 8$ in. between inside surfaces of window frame; at the top, middle, and bottom
Record the narrowest width of the three.

## (2) MEASURE HEIGHT

Measure to the nearest $1 / 8$ in. from inside surface at top of window to top of sill; at the left, middle, and right.
Record the tallest height of the three.

## (3) MEASURE DEPTH

Measure exact depth of window casing making note of any obstacles i.e. handles, tracks or cranks that could interfere with the blind or shade function.
Use the shortest depth.

## OUTSIDE MOUNT (OM) INSTALLATION — For increased light

control and privacy

## (1) MEASURE WIDTH

Measure to the nearest $1 / 8$ in. between outermost points where shade is to be placed. Measurement should overlap each side of window frame by at least $1 \frac{1}{2}$ in.

## (2) MEASURE HEIGHT

Measure to the nearest $1 / 8$ in. from where top of shade will be located to top of sill, or measure to point of shade reach if no sill.

## HELPFUL HINTS

Always use a metal tape measure as cloth may stretch

Measure your window not your existing blind or shade

Measure each window separately even if they appear to be identical

Check depth to ensure shade will clear any obstacles and can accommodate headrail if flush mount is desired

If you prefer shade not to touch sill, deduct $1 / 4^{\prime \prime}$

If there is no sill, measure height to point where shade is to reach

NOTE: Take all measurements to the nearest $1 / 8 \mathrm{in}$. DO NOT take any deductions. The factory will make the necessary adjustments to help ensure your window covering operates smoothly.

Visit www.LEVOLOR.com/how-to-measure for more measuring information

## Window and Measuring Terminology

## How to Measure Multiple Shades on One Headrail (2-on-1 or 3-on-1 Headrail)

## INSIDE MOUNT (IM) INSTALLATION — For a beautiful framed look

## (1) MEASURE WIDTH

Total Shade Width - Measure to the nearest $1 / 8$ in. between inside surfaces of window frame; at the top, middle, and bottom.

Record the narrowest width of the three.
Left Shade Width - Measure the width that you want the left shade to cover.
Order this shade first when placing your order.
Right Shade Width (for 3-on-1 only) — Measure the width that you want the right shade to cover.

## (2) MEASURE HEIGHT

Overall Shade Height - Measure to the nearest $1 / 8 \mathrm{in}$. from inside surface at top of window to top of sill; at the left, middle and right
Record the tallest height of the three.

## (3) MEASURE DEPTH

Measure exact depth of window casing making note of any obstacles i.e. handles,
tracks or cranks that could interfere with the blind or shade function.
Use the shortest depth.

OUTSIDE MOUNT (OM) INSTALLATION - For increased light control and privacy
(1) MEASURE WIDTH

Overall Shade Width - Measure to the nearest $1 / 8$ in. between outermost points where shade is to be placed. Add an additional 3 in . to 6 in . to total width for maximum privacy.
Left Shade Width - Measure the width that you want the left shade to cover.
Order this shade first when placing your order.
Right Shade Width (for 3-on-1 only) - Measure the width that you want the right shade to cover.

## $(2$ MEASURE HEIGHT

Overall Shade Height - Measure to the nearest $1 / 8$ in. from where top of shade will be located to top of sill, or measure to point of shade reach if no sill.

3-on-1 Headrail
$\qquad$

## 2-ON-1 \& 3-ON-1 HELPFUL NOTES:

- Order the left shade first when placing order
- Each shade operates separately
- There will be a gap between the fabric on the left and right shades to operate independently
- Fabrics cannot be seamed or overlapped
- Always use a metal tape measure as cloth may stretch
- Take all measurements to the nearest $1 / 8$ inch. DO NOT take any deductions
- The factory will make the necessary adjustments to help ensure your shade operates smoothly
- Panel sizes follow single shade size limits, see critical dimensions page for details

## 2-ON-1 HELPFUL NOTES:

- Available in cordless, corded, and continuous cord loop operating systems
- Top-Down/Bottom- Up and Day/Night options available
- For standard Bottom-Up shades, controls will be located on the left side of the left shade and the right side of the right shade

## 3-ON-1 HELPFUL NOTES:

- Available in cordless bottom-up operating system only

See critical dimensions section on page 7 for additional information.

## Product Specifications

Use technical information listed below to assist in product selection.

| Operating System \& Shade Function Combinations |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

## MOTORIZATION

Control light and privacy with a simple click.

- Program your shades to adjust automatically using LEVOLOR's scheduling app
- Or, adjust shades using the remote

Group multiple shades to open and close simultaneously and save pre-set favorite position

- Must purchase 6-channel remote in order to use scheduling app

App is available for iOS and Android product

- LEVOLOR app is powered by Bluetooth connectivity, allowing your iOS and Android devices to control your window coverings wirelessly over short distances. Both your mobile device and remote must be within range of your window covering(s) in order to control them using the app.

| Battery Specifications - Motorized Only |  |  |
| :--- | :---: | :---: |
| Battery | Type | Quantity |
| Standard Battery Pack | AA 1.5V Alkaline | 12 |
| Satellite Battery Pack | AA 1.5V Alkaline | 12 |
| Standard Remote | AAA Alkaline | 2 |

TOTE. Expected battery life is one year depending on usage, and size and weight of the blind. Lithium and rechargeable batteries are not recommended. Not compatible with Google Home, Amazon Alexa, and other smart home systems.

SATELLITE BATTERY PACK
An optional power source that allows the battery pack to be mounted on the top of a headrail, next to molding or under the sill. It is the best choice when the window covering is mounted in a high window, restricting access to the battery pack. Must be selected at time of order.

- Available in 4 wire lengths: 15 inches, 4 feet, 10 feet, 20 feet
- Satellite battery pack cover can be painted
- Each battery tube uses 12 AA 1.5V alkaline batteries
- Battery life varies depending on usage
- Replace batteries when the window covering(s) begin to operate slowly
- Satellite battery pack cover can be painted

## Cellular Hardware Color Coordination Guide

Coordinating hardware colors are pre-selected based on fabric color. The color samples below represent headrail, bottom rail, end cap, and tassel colors.

The Fabric Index chart on the following page identifies which hardware color number matches each fabric color.

| 00110 | 00275 | 00292 | 50001 | 50002 | 50003 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 700114 | 70121 | 70134 | 70136 | 70145 | 70147 |
| 70152 | 70800 | 70802 | 70803 | 70804 | 80001 |
| 80006 | 80012 | 80031 | 80120 | 80166 | 80204 |
| 80310 | RE011 | BEO18 | GY051 | OR001 |  |

NOTE: The actual color of the hardware may vary from the samples in the color coordination guide.
Color lot variations may occur with fabric and/or hardware due to the process of color application. For the best color match, order all shades for a room at the same time. Pattern availability and color lot match between orders cannot be assured.

## Parts and Components

| Corded | Component |
| :---: | :--- | :---: |
| Part Number |  |

$\bigcirc$

G

Dimensions shown for tassel. Cannot be ordered separately.

LEVOLOR Customer Service - 800-538-6567

## Specialty Shapes

Specialty Shapes such as skylights, arches and angles are available. Some options will function as a traditional shade, others are stationary. For information about specialty shapes, sizing options, critical dimensions and steps for creating a template visit LEVOLOR.com/cellularoptions.

## SPECIALTY SHAPE OPTIONS:

| - Arch | - Half Arch | - Circle |
| :--- | :--- | :--- |
| - Octagon | • Skylight | - Fanned Angle |
| - Hexagon | - Cutout | - Bay Windows |

Skylight

Arch

A skylight pole can be purchased separately to raise and lower skylights, some specialty shapes and any hard to reach cordless shades.

## Cleaning and Care

All LEVOLOR Cellular Shades are made of $100 \%$ polyester and with multiple cleaning options, these easy to care for shades will maintain their beautiful appearance for years to come.

Note: Improper cleaning may void warranty

## DUSTING

Use a feather duster for regular cleaning.

VACUUMING
Use a low suction vacuum with a brush- type cleaner attachment; stroke lightly over the shade to clean.

## FORCED AIR

Blow away dirt and debris using clean compressed air.

## SPOT-CLEANING/STAIN REMOVAL AT HOME

Use warm water and a mild soap, like Woolite ${ }^{\circledR}$ or Scotchgard ${ }^{\oplus}$, if needed

## PROFESSIONALINJECTION/EXTRACTION CLEANING

Call local on-site blind/shade cleaner that injects a cleaning solution into the fabric and extracts the dirty solution at the same time. The service is typically performed at home so you do not need to remove your window treatments.
