How To Measure Quickly and Accurately

INSIDE MOUNT (IM) INSTALLATION — For a beautiful framed look
(1) MEASURE WIDTH

Measure to the nearest $1 / 8$ in. between inside surfaces of window frame; at the top, middle, and bottom.
Record the narrowest width of the three.

## (2) MEASURE HEIGHT

Measure to the nearest $1 / 8$ in. from inside surface at top of window to top of sill; at the left, middle, and right.
Record the tallest height of the three.

## (3) MEASURE DEPTH

Measure exact depth of window casing making note of any obstacles i.e. handles, tracks or cranks that could interfere with the blind or shade function.
Use the shortest depth.

## OUTSIDE MOUNT (OM) INSTALLATION — For increased light <br> control and privacy

## (1) MEASURE WIDTH

Measure to the nearest $1 / 8$ in. between outermost points where shade is to be placed. Measurement should overlap each side of window frame by at least $1 \frac{1}{2}$ in.

## (2) MEASURE HEIGHT

Measure to the nearest $1 / 8$ in. from where top of shade will be located to top of sill, or measure to point of shade reach if no sill.

## HELPFUL HINTS

Always use a metal tape measure as cloth may stretch

Measure your window not your existing blind or shade

Measure each window separately even if they appear to be identical

Check depth to ensure shade will clear any obstacles and can accommodate headrail if flush mount is desired

If you prefer shade not to touch sill, deduct $1 / 4^{\prime \prime}$

If there is no sill, measure height to point where shade is to reach

NOTE: Take all measurements to the nearest $1 / 8 \mathrm{in}$. DO NOT take any deductions. The factory will make the necessary adjustments to help ensure your window covering operates smoothly.

Visit www.LEVOLOR.ca/how-to-measure for more measuring information
Window and Measuring Terminology

WINDOW COMPONENTS TERMINOLOGY

- Collectively, the sill and jambs are called the "window casement" or "frame".

INSIDE MOUNT

- Shade fits within window opening.
- Great for windows with beautiful trim.

## OUTSIDE MOUNT

- Shade mounts outside window opening.
- Increased light control and privacy.

## TWO SHADES ON ONE HEADRAIL

- Provides the clean appearance of a single shade with the ability to operate each shade independently.
- Can be mounted inside or outside.

How to Measure Two Shades on One Headrail (2-on-1 Headrail)

INSIDE MOUNT (IM) INSTALLATION — For a beautiful framed look
(1) MEASURE WIDTH

Total Shade Width - Measure to the nearest $1 / 8$ in. between inside surfaces of window frame; at the top, middle, and bottom.

Record the narrowest width of the three.
Left Shade Width - Measure the width that you want the left shade to cover.
Order this shade first when placing your order.
Right Shade Width - Measure the width that you want the right shade to cover.
(2) MEASURE HEIGHT

Overall Shade Height - Measure to the nearest $1 / 8$ in. from inside surface at top of window to top of sill; at the left, middle and right.
Record the tallest height of the three.
(3) MEASURE DEPTH

Measure exact depth of window casing making note of any obstacles i.e. handles, tracks or cranks that could interfere with the blind or shade function.
Use the shortest depth.

OUTSIDE MOUNT (OM) INSTALLATION — For increased light control and privacy
(1) MEASURE WIDTH

Overall Shade Width - Measure to the nearest 118 in . between outermost points where shade is to be placed.
Add an additional 3 in. to 6 in. to total width for maximum privacy.
Left Shade Width - Measure the width that you want the left shade to cover.
Order this shade first when placing your order.
Right Shade Width - Measure the width that you want the right shade to cover.
(2) MEASURE HEIGHT

Overall Shade Height - Measure to the nearest $1 / 8$ in. from where top of shade will be located to top of sill, or measure to point of shade reach if no sill.

2-ON-1 HELPFUL NOTES

- Available in Continuous Cord Loop Only.
- Each shade operates separately.
- There will be a gap between the fabric on the left and right shades to operate independently.
- Light gap is 1 1⁄6 in. - (Light Gap is the space needed between the 2 shades to ensure proper operation.)
- Left shade controls are on the left side and the right shade controls on the right side.
- Always use a metal tape measure as cloth may stretch.
- Take all measurements to the nearest $1 / 8 \mathrm{in}$. DO NOT take any deductions.
- The factory will make the necessary adjustments to help ensure your shade operates smoothly.

## Fabric and Solar Roller Specifications and Critical Dimensions

Use tables below to assist in purchasing, product size availability and product specifications. Please note the term "Cord Loop", in these pages, refers to a "beaded chain loop."

| Continuous Cord Loop Cord Lengths |  |
| :---: | :---: |
| Ordered Drop (inches) | Length (feet) |
| $0-24$ | 1 |
| $24-48$ | 2 |
| $48-72$ | 3 |
| $72-96$ | 4 |
| $96-120$ | 5 |

Beaded metal chain length is $2 / 3$ of total shade length.
Metal chains are provided in colors white, cream, copper, metal, gunmetal, black.

Standard Factory Deductions from Ordered Width
DO NOT make any deductions to your measurements

| DO NOT make any deductions to your measurements |  |  |
| :--- | :---: | :---: |
|  | Inside Mount | Outside Mount |
| No Valance | Up to $1 / 4^{\prime \prime}$ | $0 "$ |
| Standard Valance | Up to $1 / 4^{\prime \prime}$ | $0^{\prime \prime}$ |
| Cassette Valance | Up to $1 / 4^{\prime \prime}$ | $0 "$ |

Cassette valance will arrive with fabric insert. This cannot be overridden.

| Installation Brackets |  |  |  |
| :---: | :---: | :---: | :---: |
| Your order will include the correct number of installation brackets <br> for your shade width, as shown in the table below |  |  |  |
| Shade Width <br> (inches) <br> Up to 38 | Continuous <br> Cord Loop |  |  |
| 38 to 68 | 2 | Cordless | Motorized |
| 68 to 82 | 3 | 2 | 3 |
| 82 to 106 | 4 | 3 | 4 |
| 106 to 144 | 5 | 4 | 5 |
|  | 6 | 5 | 6 |
|  |  | N/A | 7 |

## (Fabric width is narrower than the finished shade)

|  |  | Light Gaps Per Side (inches) |  |
| :--- | :--- | :---: | :---: |
| Operating System | Lift Control | Inside Mount | Outside Mount |
| Continuous <br> Cord Loop | Left or right control, <br> right is standard | Up to $3 / 4$ | 0 |
| Cordless | Handle operates shade | Up to $\% / 16$ | 0 |
| Motorized | Right control only | Up to $5 / 8$ | 0 |

Cassette valance typically has the largest light gap.
For standard 2-on-1 shades, controls will be located on the left side of the left shade and the right side of the right shade

Fabrics in the table above on this page cannot be railroaded.

* These fabrics may be railroaded i.e. turned 90 degrees to achieve a shade width above the material width limits, to a maximum of 144 ". In such cases a seam will be sewn across the width of the shade, positioned as close to the top as possible. Any valance chosen will span the width of the blind, to maximum 144"

## Motorization and Remote Control Overview

## FEATURES

LEVOLOR ${ }^{\circledR}$ remote control motorization allows you to control light and privacy with a simple click.

- Use the "Favourite" feature to set up to 3 shading groups to a preferred position
- "ALL" feature is used to select all programmed groups for simultaneous operation
- Multiple shades can be operated simultaneously or individually

## BENEFITS

- Added safety for children and pets
- Perfect for large or hard to reach windows
- Clean look for your window

## 

## STANDARD BATTERY PACK

A tube of batteries that is connected to and installed behind the head rail to supply power to the LEVOLOR motorized operating system.

- Batteries can be changed without removing the window covering from the window
- Each battery tube uses 12 AA 1.5 V alkaline batteries, all batteries are included with initial order
- Battery life varies depending on usage
- Replace batteries when the window covering(s) begin to operate slowly
- Lithium and rechargeable batteries are not recommended
- Additional battery packs are available at time of order, if desired

Note: A single standard battery pack or a satellite battery pack will fit with any shade. There are no size limitations based on battery pack selection.

## Cleaning and Care

All LEVOLOR Roller Shades have multiple cleaning options.

Note: Improper cleaning may void warranty

## DUSTING

Use a feather duster for regular cleaning.

## VACUUMING

Use a low suction vacuum with a brush- type cleaner attachment; stroke lightly over the shade to clean.

FORCED AIR
Blow away dirt and debris using clean compressed air.

SPOT-CLEANING/STAIN REMOVALAT HOME
Use warm water and a mild soap, like Woolite ${ }^{\oplus}$ or Scotchgard ${ }^{\circledR}$, if needed.

PROFESSIONAL INJECTION/EXTRACTION CLEANING
Call local on-site blind/shade cleaner that injects a cleaning solution into the fabric and extracts the dirty solution at the same time. The service is typically performed at home so you do not need to remove your window treatments.
