Cleaning Instructions

Bali Cellular Shades are easy to keep looking fresh and new for years. Regular dusting with a feather duster is recommended. When necessary, fabric can be lightly vacuumed with a brush attachment.

If the cellular shades become soiled with topical dirt (i.e. dirt that is resting on the surface of the fabric), we recommend that the shade be spot cleaned using a soft rag or sponge, with a mild detergent and warm water. Do not use strong detergents or spot removers. Extra care should be used when cleaning Midnight fabric as the fabric could be permanently creased.

Dry cleaning is not recommended and is not covered by warranty.

Professional blind cleaners use a variety of methods to clean blinds and vary in their capabilities. While Springs Window Fashions knows that many of our window treatments can be safely cleaned using the appropriate ultrasonic or injection/extraction cleaning methods we cannot guarantee the outcome of any cleaning services provided by an independent company.

For assistance in locating a certified blind cleaner that serves your area, visit www.blindcleaners.net or contact Customer Service at 800-221-6352.
